Standard 1 – World in Spatial Terms and Uses of Geography

Students organize information and solve geographic problems using geographical tools, representations, and technologies.

- WG.1.1 Describe the impact of technology on the study of geography and gather geographic information using technological tools
- WG.1.2 Explain Earth’s grid system, using latitude and longitude to locate key places and to answer geographic questions about that place
- WG.1.3 Compare and contrast various types of maps and map projections and evaluate distortions associated with each map projection
- WG.1.4 Use geographic representations to locate the world’s continents, major landforms, major bodies of water and major countries and to solve geographic problems

Standard 2 – Physical Systems

Students answer geographic questions about Earth’s physical systems to explain ecosystems and natural processes.

- WG.2.1 Describe and categorize elements of the natural environment as belonging to one of the four components of Earth’s physical systems: atmosphere, lithosphere, biosphere, or hydrosphere
- WG.2.2 Identify and locate world climate regions and evaluate the impact of the Earth/Sun relationship, ocean currents, wind currents, and elevation on each climate region
- WG.2.3 Compare and contrast regions of the world by analyzing the plant and animal life indigenous to the region (ecosystems)
- WG.2.4 Explain and give examples of natural and human processes that shape Earth’s surface and identify specific locations where these processes occur

Standard 3 – Region

Students examine the unifying characteristics of a given region and determine the challenges and opportunities created by the development of that region.

- WG.3.1 Analyze how cooperation, conflict, and self-interest impact the cultural, political, and economic regions of the world and relations between nations
- WG.3.2 Determine the unifying characteristics that regions possess and explain changes that they have experienced over time
