

PARENT GUIDE TO COMBINATION SCHOOL REPORT CARD

Annually, the Louisiana Department of Education releases school report cards summarizing and evaluating the academic achievement of students and schools. Each report card includes information used to calculate the school's letter grade and overall performance score. These can be used by parents to determine how well their school is preparing students for the next level of studies, and how the school compares to other schools in their district and the state.

Here are some suggested questions to reflect on when reviewing the school's report card:

- How does my child's performance compare to the average performance in our school?
- How does my school's performance compare to last year? To my district? To the state?
- How are different populations of students performing in my school?

STUDENT PROFICIENCY:
Students scoring "Good" or above on End-of-Course tests or "Mastery" and above on LEAP tests are ready for the next level of study.

ACT PERFORMANCE:
The ACT, taken by all Louisiana juniors, determines a student's ability to enter postsecondary studies. This section provides information on the number of students who earned a college-going score of 18 or higher or a career-ready Silver WorkKeys Certificate or higher, as well as the average student composite ACT score compared to other schools in the district, state and country.

COLLEGE READINESS:
This information shows the rate at which students enrolled in college by the 2nd fall semester after graduation from high school.
