

In order to help LEAs plan for the 2019-20 school year using competitive funds awarded through Super App, the LDE has shared:

- A Super App Funding Summary that identifies funds awarded to each LEA from different funding sources
- A Super App Eligible Expenditures document that lists the expenditures on which funds can be spent

LEAs have discretion to use competitive funds awarded through Super App on any eligible expenditures. LEAs that choose not to use competitive funds on these expenditures must still meet all requirements for CIR and UIR Academics schools.

The following programs have an associated cost which was accounted for in your LEA's Super App allocation. This document describes the steps that LEAs should take to use competitive funds on these programs.
