

Diversity Responsive Schools

Presenter: Michael Eskridge, Ed.D.

Workshop Focus

* SEMINAR SUMMARY

Given the gaps between the achievement of students of different races and ethnicities, it seems reasonable to assume that there are conditions in schools related to race and ethnicity that affect student motivation and opportunities to learn. We invite you to a discussion that will look closely at this issue and ways we as school leaders can work proactively to meet the needs of racially and ethnically diverse students.
