DEVELOPMENT OF K-12 LOUISIANA CONNECTORS FOR ENGLISH LANGUAGE LEARNERS

The Louisiana Connectors for English language learners were informed by WestEd and the Understanding Language Initiative at Stanford University with input by hundreds of parents and teachers from across the state. The new set of English Language Proficiency (ELP) Connectors developed for K, 1, 2-3, 4-5, 6-8, and 9-12 grades, highlight and amplify the critical language, knowledge about language, and skills using language that are aligned to Louisiana Student Standards and that are necessary for English learners (ELs) to be successful in schools.

The 10 Connectors (expectations) highlight a strategic set of language functions (what students do with language to accomplish content-specific tasks) and language forms (vocabulary, grammar, and discourse specific to a particular content area or discipline) which are needed by ELs as they develop competence in the practices associated with English language arts (ELA) & literacy, mathematics, and science. The five English Language Proficiency (ELP) levels for each of the Connectors address the question, “What might an EL’s language use look like at each ELP level as he or she progresses toward independent participation in grade-appropriate activities?”

GUIDING PRINCIPLES

1. Potential

ELs have the same potential as native speakers of English to engage in cognitively complex tasks. Regardless of ELP level, all ELs need access to challenging, grade-appropriate curriculum, instruction, and assessment and benefit from activities requiring them to create linguistic output (Ellis, 2008a; 2008b). Even though ELs will produce language that includes features that distinguish them from their native-English-speaking peers, “it is possible [for ELLs] to achieve the standards for college-and-career readiness” (NGA Center & CCSSO, 2010b, p. 1).

2. Funds of Knowledge

ELs’ primary languages and other social, cultural, and linguistic background knowledge and resources (i.e., their “funds of knowledge” [Moll, Amanti, Neff, & Gonzalez, 1992]) are useful tools to help them navigate back and forth among their schools and their communities’ valuable resources as they develop the social, cultural, and linguistic competencies required for effective communication in English. In particular, an awareness of culture should be embedded within curriculum, instruction, and assessment provided to ELs since “the more one knows about the other language and culture, the greater the chances of creating the appropriate cultural interpretation of a written or spoken text” (National Standards in Foreign Language Education Project, 2006, p. 37).

3. Diversity in EL Progress in Acquiring English Language Proficiency

A student’s ability to demonstrate proficiency at a particular ELP level will depend on context, content-area focus, and developmental factors. Thus, a student’s designated ELP level represents a typical current performance level, not a fixed status. An English language proficiency level does not identify a student (e.g., “Level 1 student”), but rather identifies what a student knows and can do at a particular stage of English language development, for example, “a student at Level 1” or “a student whose listening performance is at Level 1.” Progress in acquiring English may vary depending upon program type, age at which entered program, initial English proficiency level, native language literacy, and other factors (Bailey & Heritage, 2010; Byrnes & Canale, 1987; Lowe & Stansfield, 1988). Within these ELP Connectors, we assume simultaneous development of language and content-area knowledge, skills, and abilities. ELs do not need to wait until their ELP is sufficiently developed to participate in content area instruction and assessment.

“Research has shown that ELLs can develop literacy in English even as their oral proficiency in English develops (Bunch, Kibler, & Pimentel, 2013, p. 15).
4. Scaffolding
ELs at all levels of ELP should be provided with scaffolding in order to reach the next reasonable proficiency level as they develop grade-appropriate language capacities, particularly those that involve content-specific vocabulary and registers. The type and intensity of the scaffolding provided will depend on each student’s ability to undertake the particular task independently while continuing to uphold appropriate complexity for the student.

5. Students with Limited or Interrupted Formal Education
ELs with limited or interrupted formal education must be provided access to targeted supports that allow them to develop foundational literacy skills in an accelerated time frame (DeCapua & Marshall, 2011). “Reading: Foundational Skills” (NGA Center & CCSSO, 2010).

6. Special Needs
ELs with disabilities can benefit from English language development services (and it is recommended that language development goals be part of their Individualized Education Plans [IEPs]). Educators should be aware that these students may take slightly different paths towards English language proficiency.

7. Access Supports and Accommodations
Based on their individual needs, all ELs, including ELs with disabilities, should be provided access supports and accommodations for assessments, so that their assessment results are valid and reflect what they know and can do. Educators should be aware that these access supports and accommodations can be used in classroom instruction and assessment to ensure that students have access to instruction and assessment based on the ELP Connectors. When identifying the access supports and accommodations that should be considered for ELs and ELs with IEPs or 504 plans during classroom instruction and assessment, it is particularly useful to consider EL needs in relation to receptive and productive modalities. (See footnote in Table 2 for more information.)

8. Multimedia, Technology, and New Literacies
New understandings around literacy (e.g., visual and digital literacies) have emerged around use of information and communication technologies (International Reading Association, 2009). Relevant, strategic, and appropriate multimedia tools and technology, aligned to the ELP Connectors, should be integrated into the design of curriculum, instruction, and assessment for ELs.

**DESIGN FEATURES OF THE CONNECTORS**
The 10 ELP Connectors are designed for collaborative use by English language development (ELD) and content area teachers in both English language development and content-area instruction. Explicit recognition that language acquisition takes place across the content areas fosters collaboration among educators and benefits ELs’ learning experiences.

At present, second language development is seen largely as the responsibility of the ESL/ELD teacher, while content development as that of the subject area teacher. Given the new [content] standards’ explicitness in how language must be used to enact disciplinary knowledge and skills, such a strict division of labor is no longer viable. Content area teachers must understand and leverage the language and literacy practices found in science, mathematics, history/social studies, and the language arts to enhance students’ engagement with rich content and fuel their academic performance.

ESL/ELD teachers must cultivate a deeper knowledge of the disciplinary language that EL students need, and help their students to grow in using it. Far greater collaboration and sharing of expertise are needed among ELD teachers and content area teachers at the secondary level. At the elementary level, far greater alignment and integration are needed across ELD and subject matter learning objectives, curriculum, and lesson plans that teachers in self-contained classrooms prepare and deliver (Understanding Language Initiative, 2012, p. 2).
The levels 1–5 descriptors for each of the 10 ELP Connectors describe targets for EL performance by the end of each ELP level at a particular point in time. However, students may demonstrate a range of abilities within each ELP level. By describing the end of each ELP level for each ELP Connector, the levels 1–5 descriptors reflect a linear progression across the proficiency levels of an aligned set of knowledge, skills, and abilities. This is done for purposes of presentation and understanding; actual second language acquisition does not necessarily occur in a linear fashion within or across proficiency levels.

An EL at any given point along his or her trajectory of English learning may exhibit some abilities (e.g., speaking skills) at a higher proficiency level, while at the same time exhibiting other abilities (e.g., writing skills) at a lower proficiency level. Additionally, a student may successfully perform a particular skill at a lower proficiency level but need review at the next higher proficiency level when presented with a new or more complex type of text. As a reminder, by definition, EL status is a temporary status. Thus, an English language proficiency level does not identify a student (e.g., “a Level 1 student”), but rather identifies what a student know and can do at a particular stage of English language development (e.g., “a student at Level 1” or “a student whose listening performance is at Level 1”).

**Organization of the ELP Connectors**

For the purposes of clarity, the 10 ELP Connectors are organized according to a schema that represents each Connector’s importance to ELs’ participation in the practices called for by college-and-career-ready ELA & Literacy, mathematics, and science standards (G. Bunch, personal communication, August 15, 2013; Bunch, Kibler, & Pimentel, 2013).

Table 1. Organization of the ELP Connectors in Relation to Participation in Content-Area Practices

</tr>
<tr>
<td>10</td>
<td>make accurate use of standard English to communicate in grade-appropriate speech and writing</td>
</tr>
</tbody>
</table>
The ELP Connectors are interrelated and can be used separately or in combination. (In particular, as shown above, Standards 8–10 support the other seven standards.) The standards do not include curriculum statements, nor do they privilege a single approach to the teaching of social and expressive communication or the teaching of grammar; instead, the Connectors and descriptors for each proficiency level leave room for teachers, and curriculum developers to determine how each ELP Connector and descriptor should be reached and what additional topics should be addressed.

**Alternate Organization of the ELP Connectors**

The ELP Connectors might also be framed in relation to narrower domains of listening, speaking, reading, and writing and also in relation to broader receptive, productive, and interactive modalities. The interactive modalities category allows for emphasis on the need for ELs to meaningfully engage with their peers during content area instruction. (Connectors 9 and 10 address the linguistic structures of English and are framed in relation to the Louisiana Student Standards for ELA Language domain.)

<table>
<thead>
<tr>
<th>Modalities</th>
<th>Domains</th>
<th>Corresponding ELP Connector</th>
</tr>
</thead>
<tbody>
<tr>
<td>Receptive modalities: This mode refers to the learner as a reader or listener/viewer working with 'text' whose author or deliverer is not present.</td>
<td>Listening and Reading</td>
<td>1 construct meaning from oral presentations and literary and informational through grade-appropriate listening, reading, and viewing</td>
</tr>
<tr>
<td>Productive Modalities: The mode places the learner as speaker and writer for a 'distant' audience, one with whom interaction is not possible or limited. The communication is set for a specified audience, has purpose, and generally abides by rules of genre or style. It is a planned or formalized speech act or written document, and the learner has an opportunity to draft, get feedback, and revise, before publication or broadcast. (Phillips, 2008, p. 96)</td>
<td>Speaking and Writing</td>
<td>3 speak and write about grade-appropriate complex literary and informational texts and topics</td>
</tr>
<tr>
<td>Interactivemodalities: Collaborative use of receptive and productive modalities. This mode refers to the learner as a speaker/listener [and] reader/writer. It requires two-way interactive communication where negotiation of meaning may be observed. The exchange will provide evidence of awareness of the socio-cultural aspects of communications language proficiency develops. (Phillips, 2008, p. 96)</td>
<td>Listening, Speaking, Reading and Writing</td>
<td>2 participate in grade-appropriate oral and written exchanges of information, 2 ideas, and analyses, responding to peer, audience, or reader comments and questions</td>
</tr>
<tr>
<td></td>
<td></td>
<td>5 Conduct research and evaluate and communicate findings to answer questions or solve problems</td>
</tr>
<tr>
<td></td>
<td></td>
<td>6 analyze and critique the arguments of others orally and in writing</td>
</tr>
</tbody>
</table>

1 The terms receptive and productive language functions were used for the ELP standards schema, rather than the newer American Council of Foreign Language Teaching (ACTFL) terms used in Phillips (2008), in keeping with the functional language terms used in the CCSSO (2012) ELPD Framework (which employs the earlier ACTFL terminology).

2 The ability to communicate via multiple modes of representation (e.g., non-verbal communication, oral, pictorial, graphic, textual) may be especially important for ELs with certain types of disabilities. When identifying the access supports and accommodations that should be considered for ELs and ELs with IEPs or 504 plans, it is particularly useful to consider ELL needs in relation to broader receptive, productive, and interactive modalities when listening, speaking, reading, or writing are not the explicit focus of the construct(s) being instructed or assess.

</tbody>
</table>
Support Resources and Tools
As ELs learn and practice English in the classroom, they simultaneously interact with grade-level academic content. The ELP Connectors describe higher expectations for ELs by integrating language development with appropriate academic content by grade. The Connectors describe how language is used to meet the rigorous content demands in each grade and how ELs progress toward English language proficiency.

Design Features of the Correspondences with English Language Arts/Literacy, Mathematics, and Science Standards

To ensure the ELP Connectors specify the language that all ELs must acquire in order to successfully engage with Louisiana Students Standards in ELA & Literacy, mathematics, and science, two methods of correspondence mappings have been conducted for these ELP Connectors:

1. **Correspondences with the Louisiana Student Standards for Mathematics and Science Standards Practices**

Following the guidance found in the CCSSO Framework for English Language Proficiency Development Standards Corresponding to the Common Core State Standards and the Next Generation Science Standards (the “CCSSO ELPD Framework”) (CCSSO, 2012), one set of correspondences was created for the language demands associated with the mathematics, science, and ELA practices. The Louisiana Standards for Mathematics, a.k.a. mathematical practices and the Louisiana Student Standards for Science, a.k.a. science practices. A set of ELA “Practices” was created for the Louisiana Student Standards for ELA since they did not include specific practices in their original form. (All three groups of practices are shown in Figure 1 below).

2. **Correspondences with the Louisiana Student Standards for ELA & Literacy Standards**

A second type of correspondence analysis was conducted to show the relationship between the ELP Connectors and the language demands found in the Louisiana Student Standards for ELA & Literacy. This second set of correspondences is particularly useful as the ELP Connectors and the Louisiana Student Standards for ELA & Literacy Standards have a similar internal construction (based on reading, writing, speaking, listening, and language).

**What are the practices?**

The term *practices* refers to behaviors which developing student practitioners should increasingly use when engaging with the content and growing in content-area maturity and expertise throughout their elementary, middle, and high school years. The term “practices” is used rather than “processes” or “inquiry skills” to emphasize that engaging in [discipline-specific] investigation requires not only skill but also knowledge that is specific to each practice (NRC, 2012, p. 30).

The practices identified within the Louisiana Student Standards for Mathematics and Science are key parts of the standards themselves. Because the Louisiana Student Standards for ELA & Literacy does not explicitly identify key practices and core ideas in its original form, an analogous set of ELA “Practices” was created through a close analysis of the priorities contained within the ELA standards themselves (CCSSO, 2012, p. 16). Relationships and convergences among the mathematics, science, and ELA practices are shown in Figure 1.
Design Features of the Correspondences

Why are no correspondence analyses shown between the ELP Connectors and the Louisiana Student Standards for Mathematical and Science Core Ideas?

In coordination with the ELPD Framework authors, the WestEd ELP Standards development team followed the ELPD Framework method for ELP Standards-to-Content Standards correspondences. This method is based on an analysis of the language demands found within the mathematics, science, and ELA practices. (See Section 2.3 Standards Match.) The ELPD Framework correspondence approach of focusing on the practices is a useful way to approach ELP Standards correspondences with mathematics [and science because . . . The content of mathematics is not as fundamentally different from English language proficiency as much as it is a different granularity. Mathematics content is more interrelated and web-like and less hierarchic and linear than mathematicians used] to think. If we think of the Mathematical Practices (MP) [the Standards for Mathematical Practice] as the reading and writing (R&W) of mathematics and the content standards (C) as the literature (L) —

\[
\text{MP : C :: R&W : L, or, equivalently, MP : R&W :: C : L}
\]

— then it makes more sense to correspond to the Standards for Mathematical Practice (R&W) as opposed to the Standards for Mathematical Content (C) (P. Daro, personal communication, July 19, 2013).

How do the practices interrelate?
The Understanding Language Initiative Venn diagram shown in Figure 1 (Cheuk, 2013) depicts the relationships and convergences among the student actions described by the practices.\(^5\) For example, the central overlap of the three circles highlights the central role of evidence in the Louisiana Student Standards. In comparison, the ELP Connectors address the types of language proficiency that ELs need as they engage in content-area practices (and, therefore, may show slightly different groupings of practices with each ELP Connector than the groupings shown in Figure 1). “By explicitly calling attention to these practices, state ELP Connectors [can be designed to] cultivate higher order thinking skills in ELLs and target their ability to comprehend and communicate about complex text” (CCSSO, 2012, p. 16).

\(^5\)See the “Found in” section of Figure 1 for information on the sources for this diagram. Background: The ELA “Practices” in the Venn diagram were originally based on an analysis of the CCSS for ELA student capacity portraits (Source 2a). For the purposes of the ELP Standards, the ELA “Practices” shown in the Venn diagram were reframed in relation to the particular ELA “Practices” created for the ELPD Framework(Source 2b)

when engaging in one or more of the following content-specific practices:

- **EP1.** Support analyses of a range of grade-level complex texts with evidence.
- **EP3.** Construct valid arguments from evidence and critique the reasoning of others.
- **EP4.** Build and present knowledge from research by integrating, comparing, and synthesizing ideas from texts.
- **EP5.** Build upon the ideas of others and articulate his or her own ideas when working collaboratively.

when engaging in tasks aligned with the following Grade One Louisiana Student Standards for ELA:

**Literature**
- **RL.2.** Retell stories, including key details, and demonstrate understanding of their central message or lesson.
- **RL.3.** Describe characters, settings, and major events in a story, using key details.
- **RL.1.** Ask and answer questions about key details in a text.
- **RL.7.** Use the illustrations and details in a text to describe its key ideas.

**Informational Text**
- **RI.1.** Ask and answer questions about key details in a text.
- **RI.2.** Identify the main topic and retell key details of a text.
- **RI.3.** Describe the connection between two individuals, events, ideas, or pieces of information in a text.

**when engaging in one or more of the following content-specific practices:**

- **EP2.** Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
- **MP6.** Attend to precision.
- **SP8.** Obtain, evaluate, and communicate information.

**when engaging in tasks aligned with the following Grade One Louisiana Student Standards for ELA:**

- **L.1.** Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.
  - a. Print all upper- and lowercase letters.
  - b. Use common, proper, and possessive nouns.
  - c. Use singular and plural nouns with matching verbs in basic sentences (e.g., He hops; We hop).
  - d. Use personal, possessive, and indefinite pronouns (e.g., I, me, my; they, them, their, anyone, everything).
  - e. Use verbs to convey a sense of past, present, and future (e.g., Yesterday I walked home; Today I walk home; Tomorrow I will walk home).
  - f. Use frequently occurring adjectives.
  - g. Use frequently occurring conjunctions (e.g., and, but, or, so, because).
  - h. Use determiners (e.g., articles, demonstratives).
  - i. Use frequently occurring prepositions (e.g., during, beyond, toward).
  - j. Produce and expand complete simple and compound declarative, interrogative, imperative, and exclamatory sentences in response to prompts.
The purpose of this Proficiency Level Descriptors for English Language Proficiency Standards document is to complement, rather than replace, the ELP Connectors. This document provides summary definitions and more detailed descriptions of what ELs’ language forms might look like as ELs gain proficiency with the strategic set of language functions outlined in the ELP Connectors. Following a glossary of key terms, the document concludes with an appendix that provides background information about the contexts in which the PLDs are situated.

Proficiency Level Descriptor Summaries

In general, PLDs provide “descriptions of the level of English language knowledge and skills required of each [proficiency] level” (Perie, 2008, p. 15). When designing the ELP Standards, the language forms outlined in the PLDs were embedded throughout the grade-level/grade-span ELP Connectors according to the grade-appropriate expectations that had been placed in each ELP Connector.

High level summaries of the PLDs provide an overview in relation to:

1. the degree of control of English that ELs typically show as they participate in grade-appropriate classroom-based activities involving the strategic language functions outlined in the ELP Connectors; and

2. what the forms of ELs’ language-related performance typically look like.

6 A note on the use of the term Proficiency, rather than Performance, in this phrase: The ELP Connectors focus on proficiency levels rather than performance levels.

For consistency with the ELP Connectors, this document uses the term Proficiency Level Descriptors, rather than Performance Level Descriptors as had been suggested in Perie (2008), a journal article that primarily focuses on creating PLDs for content-area assessments. The descriptors detailed in this document address five ELP levels; the uppermost ELP level is part of the calculation of whether a student is fully English proficient.

7 As used in the ELP Connectors, the term language forms refers to vocabulary, grammar, and discourse specific to a particular content area or discipline used in the ELP Connectors; the term language functions refers to what students do with language to accomplish content-specific tasks.
Additionally, once a student is considered English proficient for the purposes of EL assessment and eligibility for EL services, the student will continue to develop English language skills beyond involvement in an English language development program. Development of language skills is an ongoing process that continues throughout one’s lifetime.

**Detailed Proficiency Level Descriptors**

The progressions shown in Table 2 provide more detailed information on the language forms which were embedded in ELP Standards according to grade-appropriate expectations. They show an increasingly sophisticated use and control of language forms at the discourse, sentence, and vocabulary levels, as ELLs develop use and control of the language functions needed to participate in content-specific practices (Bailey, Reynolds Kelly, Heritage, Jones & Bernstein-Blackstock, 2013; Bailey & Heritage, 2008; Cook, White, Castro, Patton, & Bird, 2012; Valdes, Walqui, Kibler, & Alvarez, 2012).

During development, the PLDs in Table 2 were framed in relation to the “high-leverage characteristics” (Bailey, et al., 2013 p. 84) needed for addressing the language demands found within CCR standards, at the discourse, sentence, and vocabulary levels. Bailey and colleagues (2013) clarify that “Analogous to Stevens et al.’s (2009) notion of a hypothetical learning trajectory, linguistic hallmarks present the trajectory of individual linguistic and discourse features” (p.74) helping to delineate steps taken along the progression of English language development. Based on the authors’ preliminary analyses of pilot data, characteristics for discourse, sentence, and vocabulary levels include:

1. **Discourse level:** level of control over organization, cohesion, and overall stamina
2. **Sentence level:** sophistication of sentence structure
3. **Vocabulary level:** sophistication of vocabulary (e.g., range and specificity), including expansion of word groups and grammatical forms

**Table 2. Detailed Proficiency Level Descriptors for Forms Embedded within the ELP Connectors**

**Sentence Level**

- How much information is packed within a sentence structure (clause) or sentence?

- syntactically simple sentences including:
  - verb tenses such as present, present progressive, simple future (going to), simple past
  - modifiers such as adjectives, adverbs
  - simple grammatical constructions (e.g., commands, some wh questions, declaratives)
  - common social and instructional patterns or forms

- combinations of simple sentence structures including:
  - verb tenses such as past tense (irregular), past progressive, simple future
  - modifiers such as frequently occurring prepositions, adjectives, adverbs
  - repetitive phrases and sentence patterns across content areas

- descriptive sentences characterized by frequently occurring complex sentence structures including:
  - verb tenses such as present perfect
  - modifiers such as subordinating conjunctions, and prepositional phrases
  - simple, compound and some complex grammatical constructions (e.g., (independent, dependent, relative, and adverbial) across content areas

- descriptive sentences characterized by increasingly complex sentence structures including:
  - verb tenses such as past perfect
  - modifiers such as phrases and clauses within a sentence (recognizing and correcting most misplaced and dangling modifiers)
  - expanded simple compound, and complex sentence patterns characteristic of content areas

- descriptive sentences characterized by wide variety of sophisticated sentence structures including:
  - verb tenses such as passive voice and subjunctive
  - modifiers such as phrases and clauses within a sentence (recognizing and correcting most misplaced and dangling modifiers)
  - a wide range of idiomatic and unique sentence patterns characteristic of content areas

**Vocabulary Level**

- What is the range and specificity of words, phrases, and expressions used?

- a limited (i.e., initial) range of simple vocabulary including:
  - very frequently occurring words and phrases (everyday terms, cognates, and expressions with clear, easily demonstrated referents)

- a developing vocabulary including:
  - words and phrases in spoken and written forms in a growing number of contexts, such as specific content-area terms, cognates, and expressions

- a wider vocabulary including:
  - a developing vocabulary including:
  - a developing vocabulary including:

- a wide vocabulary including:
  - a larger proportion of vivid, less frequently occurring words and phrases
### A Note on Tables 1 and 2

The Levels 1–5 descriptors in Table 1 and Table 2 describe targets for EL performance by the end of each ELP level. However, students may demonstrate a range of abilities within and across each ELP level; second language acquisition does not necessarily occur in a linear fashion within or across proficiency levels. Differences in abilities within ELP levels are based upon ELs’ native language proficiency, their academic background in their first language, and their individual differences. For the purposes of presentation and understanding, the Levels 1–5 descriptors describe proficiency at the end of each ELP level in terms of a linear progression across the proficiency levels of an aligned set of knowledge, skills, and abilities.

At any given point along their trajectories of English learning, ELs may exhibit some abilities (e.g., speaking skills) at a higher proficiency level while exhibiting other abilities (e.g., writing skills) at a lower proficiency level. Additionally, a student may successfully perform a particular task at a lower proficiency level but need review at the next highest proficiency level when presented with a new or more complex type of task. Since, by definition, EL status is a temporary status, an ELP level does not categorize a student (e.g., “a Level 1 student”), but, rather, identifies what a student knows and can do at a particular stage of ELP (e.g., “a student at Level 1” or “a student whose listening performance is at Level 1”).

### A Note on Tables 1 and 2

The Levels 1–5 descriptors in Table 1 and Table 2 describe targets for EL performance by the end of each ELP level. However, students may demonstrate a range of abilities within and across each ELP level; second language acquisition does not necessarily occur in a linear fashion within or across proficiency levels. Differences in abilities within ELP levels are based upon ELs’ native language proficiency, their academic background in their first language, and their individual differences. For the purposes of presentation and understanding, the Levels 1–5 descriptors describe proficiency at the end of each ELP level in terms of a linear progression across the proficiency levels of an aligned set of knowledge, skills, and abilities.

At any given point along their trajectories of English learning, ELs may exhibit some abilities (e.g., speaking skills) at a higher proficiency level while exhibiting other abilities (e.g., writing skills) at a lower proficiency level. Additionally, a student may successfully perform a particular task at a lower proficiency level but need review at the next highest proficiency level when presented with a new or more complex type of task. Since, by definition, EL status is a temporary status, an ELP level does not categorize a student (e.g., “a Level 1 student”), but, rather, identifies what a student knows and can do at a particular stage of ELP (e.g., “a student at Level 1” or “a student whose listening performance is at Level 1”).
A Note on Scaffolding

While many ELP standards’ PLDs include references to scaffolding, the PLDs shown in this document do not include reference to scaffolding in relation to ELP levels. As outlined in Guiding Principle 4 of the ELP Standards, it is recommended that scaffolding should not be framed only as support to be provided to ELs with lower levels of ELP, and it is important to avoid encouraging or reinforcing static notions of what students can or cannot do at various levels of ELP. **Guiding Principle 4 states:**

> ELs at all levels of ELP should be provided with scaffolding in order to reach the next reasonable proficiency level as they develop grade-appropriate language capacities, particularly those that involve content-specific vocabulary and registers. The type and intensity of the scaffolding provided will depend on each student’s ability to undertake the particular task independently while continuing to uphold appropriate complexity for the student. (CCSSO, 2013, p. 4; emphasis added)

It is important that educators use a more nuanced approach to scaffolding (Walqui, Bunch, Kibler, & Pimentel, 2013). Scaffolding can be provided to students throughout the process of ELP, not just at the lower ELP levels.

Students at every level of English language proficiency will engage in some academic tasks that require little or no scaffolding because the students have already mastered the requisite skills and language; other tasks that require moderate scaffolding because the students can carry out some aspects of the task independently but require linguistic or other support for other aspects; and tasks that require substantial scaffolding because they entail cognitively and linguistically unfamiliar and challenging content or skills. (Walqui et al., 2013, p. 5; emphasis in original)
The horizontal axis of the BICS/CALP matrix represents a continuum from 'context-embedded' to 'context-reduced', ranging from the situation in which the learner uses external clues and information, such as facial gestures, real objects and pictorial representation to enable understanding, to the other extreme where the learner must rely on linguistic cues, and knowledge about language and text to understand meanings. The vertical axis relates to the degree of active cognitive involvement in a task, moving from tasks that are not very demanding to increasing cognitively challenging activities. So, an activity in the upper left corner (cognitively undemanding and context-embedded) such as face to face conversations might be appropriate for a beginner, but tasks in the lower right corner (more cognitively demanding and context-reduced) such as writing a standardized test, would be a task for advanced learners. Cummins' model has proved helpful in identifying and developing appropriate tasks for bilingual pupils. For example, in preparing tasks for a newly arrived second language learner, teachers might start with contextualized tasks and practical activities that are of low cognitive demand, such as naming items or a simple matching exercise. More proficient learners would require contextual support, but would need more cognitively demanding tasks.

The ultimate goal is to take students from quadrant A, where they have conversational skills but still need context clues to comprehend well, to quadrant D where they will have success with cognitively demanding tasks without context clues.
How do you do that?

The answer lies in quadrant **B** where students receive instruction in cognitively demanding grade level tasks but still have the support from specially designed instruction to assist them with understanding. This is why Sheltered English instruction is so important for the student who is limited in English, and why teachers must provide context rich instruction.

Also, it is important to understand that a student may exhibit language which appears fluent in general conversational settings, but who may still have difficulty in academic settings. He may have the basic fluency to be successful with cognitively undemanding tasks but may lack the literacy required for academically and cognitively demanding activities. The teacher needs to be aware of the needs of the English Language Learner in order to design the instruction with all of the supports needed. With that support in place the student will eventually be able to move into quadrant **D** activities with great success.
The English Language Proficiency Connectors are written as pathways to the Louisiana Student Standards. The ELP Connectors are designed to supplement the Louisiana Student Standards to ensure that English learners (ELs) develop proficiency in both the English language and the concepts and skills contained in Louisiana Student Standards.

This section contains language functions and forms that native English speakers acquire mostly before entering school or naturally at home. These language functions and forms, however, need to be explicitly taught to English learners (ELs). They may be taught to ELs at all grade levels, and as the need and context arises.

**Forms** of a language deal with the internal grammatical structure of words. The relationship between *boy* and *boys*, for example, and the relationship (irregular) between *man* and *men* would be **forms** of a language.

A language **function** refers to the purpose for which speech or writing is being used. **In speech** these include:

- giving instructions
- introducing ourselves
- making requests

**In academic writing** we use a range of specific functions in order to communicate ideas clearly. These include:

- describing processes
- comparing or contrasting things or ideas, and
- classifying objects or ideas

The contrast between **form** and **function** in language can be illustrated through a simple medical analogy. If doctors studied only a limited portion of the human system, such as anatomical form, they would be unable to adequately address their patient’s needs. To fully treat their patients, physicians must understand the purposes of the human body and the relationships between organs, cells, and genes (Pozzi, 2004). Similarly, ELLs need to understand both the **form** (structure) and the **function** (purpose) of the English language in order to reach higher levels of proficiency.

</tbody>
</table>
**QUESTIONS TO ASK:**

- What linguistic challenges will the lesson/text present? *(Function and/or Form)*
- What vocabulary/language structure *(Forms)* needs pre-teaching so students can comprehend and participate?
- What level of differentiation (scaffolds provided) must be done so that students can participate independently (listening, speaking, reading, writing)?

**KEEP IN MIND:**

- EL students may appear proficient as they talk about personal topics, but will develop difficulty when they are required to listen, speak, read and write in academic content areas.
- We can help ELs develop academic proficiency by teaching the language they need to complete a required task.
- Attempt to increase academic demands while decreasing language demands.

**LANGUAGE DEMANDS (OBJECTIVE):**

1. What is the content knowledge (objective) being presented in the lesson?
2. What is the purpose for which the language is being used? *(language function)*

- express needs/likes
- describe
- retell
- predict
- compare/contrast
- summarize
- question
- explain
- persuade
- cause/effect
- define
- sequence
- convince
- label
- demonstrate
- classify
- provide
- use
- apply
- determine
- justify
- discuss
- apply
- suggest

*(Not an exhaustive list)*
3. What will students do to accomplish the above purpose (language skills)?
   Listen  Speak  Read  Write

Types of Language Demands

**Receptive** - demands that refer to the language students **must understand** in order to complete task

**Productive** - demands that refer to language students **must use** to complete task

**Interactive** - kind of productive demands that involve **two-way interactive communication** and negotiation of meaning

4. What vocabulary/concepts are essential for students to engage in the lesson? What is the content-area vocabulary that students need to use, produce, process and/or understand?

5. What **form** (grammar or language structure) could be addressed in lesson or student will need to complete task?

   - forming questions
   - nouns
   - pronouns
   - adjectives
   - adverbs
   - verb tense
   - use of “s”
   - subject-verb agreement

   - sentence structure
   - punctuation
   - pronouns
   - if ____ , then statements
   - comparisons
   - contractions
   - plurals
   - more than, less than

(Not an exhaustive list)
6. What activity/assignment will the students be responsible for? What supports (graphic organizer, pictures sentence/paragraph frames; manipulatives, book on tape, native English speaking partner, etc.) will the students need to independently complete the task?

Write down everything that students need to demonstrate, know, or do in order to successfully complete task(s) in terms of...

GLOSSARY

**Cognate**: A word that has the same linguistic derivation as another; from the same original word or root. Examples of cognates in Indo-European languages are the words *night* (English), *nuit* (French), *Nacht* (German), *nacht* (Dutch), etc., derived from the Proto-Indo-European (PIE) *nókʷts*, "night"; the Hebrew שלום shalom, the Arabic سلام salām, and the Amharic selam ("peace") are also cognates, derived from Proto-Semitic *šalām*-.

**False cognates** are words that are commonly thought to be related (have a common origin), but that linguistic examination reveals are unrelated. The words *embarrassed* (self-conscious, humiliated) in English and *embarazada* (pregnant) in Spanish are examples of false cognates.

**Coherence**: A central, main theme or topic maintained across multiple sentences. One test of coherence is that sentences cannot be reordered without changing meaning.

**Cohesion**: Intra- and inter-sentence language connections made by using cohesive devices (e.g., pronoun or synonym replacement, logical connectors, conclusions that refer to prior content).

**Collocation**: The grouping of two or more words together with a frequency greater than chance. Such terms as "crystal clear," "middle management," "nuclear family," and "cosmetic surgery" are examples of collocated pairs of words.

**Content-specific**: Specific to a given discipline, content area, domain, or subject area. (Within the literature and among researchers, the term “discipline-specific” is more commonly used.) CCSSO (2012) defines it as "the language used, orally or in writing, to communicate ideas, concepts, and information or to engage in activities in particular subject areas (e.g., science)” (p. 107).

**Context**: This term is derived from Latin, meaning “a joining together” of external sources of information (schemas) with internal concepts (e.g., memories). It is also defined as a frame (e.g., background information, schema) that surrounds an event being examined and provides resources for appropriate interpretation (Duranti & Goodwin, 1992). As Fillmore observed, “When you pick up a word, you drag along with it a whole scene” (Fillmore, 1975, p. 114). Cummins (2000) describes effects of context on communication:

- **Context-embedded communication**: Participants can actively negotiate meaning (e.g., by providing feedback that the message has not been understood), and the language is supported by a wide range of meaningful interpersonal and situational cues.

- **Context-reduced communication**: Participants rely primarily on linguistic cues to meaning, and thus, successful interpretation of the message depends heavily on knowledge of the language itself.
Control: As used in the ELP Standards, refers to the degree to which a student may use a particular form with stability and precision. For example, independent control occurs when “In more sophisticated explanations, children have little or no difficulty simultaneously employing many complex and sophisticated linguistic devices [see Linking words], and their explanations require little effort from a listener to understand the steps or process being explained” (Bailey, 2013, p. 13).

Culture: (a) Different tools, thoughts, and experiences associated with a particular community of practice or certain situations (Brown, Collins, & Duguid, 1989); or (b) “an adaptive process [as opposed to an object that one might hold] that accumulates partial solutions to frequently encountered problems” (Hutchins, 1995, p. 354). “Human growth and creativity tend to occur not within separate and isolated cultures, but within their meeting and intermixture” (Wax, 1993, p. 108).

Descriptive sentences: Sentences in which the speaker/writer is able to describe or paint an exact picture in the listener’s or reader’s mind of what the speaker/writer wants to convey. Unlike a simple sentence (e.g., “The cat ran”), a descriptive sentence uses adjectives and adverbs as well as complex sentence construction (dependent, adverbial clauses, prepositional phrases, etc.) (e.g., “The big fat white cat ran quickly along the edge of the garden” which could be expanded to “It was astonishing, although not surprising, to observe that Mr. Dewey’s big fat white cat could run along the edge of the garden so quickly when there was a ferocious dog in close pursuit”).

Discourse: Language used in a particular context, such as the academic discourse of a science classroom compared to the social discourse of the playground. Different types of discourse call for different vocabulary, phrases, structures, and language registers. According to Gee (1999), language is always used from a perspective and always occurs within a context; there is no neutral use of language.

ELPD Framework: The Framework for English Language Proficiency Development Standards Corresponding to the Common Core State Standards and the Next Generation Science Standards (CCSSO, 2012), which provides guidance to states on how to use the expectations of the Common Core State Standards and the Next Generation Science Standards as tools for the creation and evaluation of ELP standards.

English language proficiency (ELP): “A socially constructed notion of the ability or capacity of individuals to use language for specific purposes” (CCSSO, 2012, p. 107). Also referred to by some as English language development (ELD), ELP embodies the belief that language development is ongoing. Multiple pathways to ELP are possible, but the end goal for students’ progress in acquiring English is to ensure full participation of ELLs in school contexts.

EP: ELA “Practices,” which describe ways in which developing student practitioners of ELA should increasingly engage with the subject matter as they grow in content-area maturity and expertise throughout their elementary, middle, and high school years. The practices are student actions, not teaching practices. Developed for the ELPD Framework by CCSS for ELA writer Susan Pimentel as analogous to the existing mathematics and science & engineering practices, but not found in the original CCSS for ELA.
Evidence: Facts, figures, details, quotations, or other sources of data and information that provide support for claims or analyses and that can be evaluated by others. Evidence should appear in a form, and be derived from a source, that is widely accepted as appropriate to a particular discipline, such as details or quotations from a text in the study of literature or experimental results in the study of science. (See Appendix A of the CCSS for ELA & Literacy.)

Formulaic expressions: Expressions produced in accordance with a mechanically followed rule or style. In the initial stages of English language acquisition, formulaic expressions are learned as a “chunk” in reference to familiar topics or objects in the immediate environment. Examples of formulaic expressions used during the initial phrase of English language acquisition in schools include “go to the bathroom,” “stand in line,” and other habitually-used phrases. These prefabricated units are important because they serve as a bridge to connect vocabulary and grammar. Cowie (1998) argues that formulaic expressions are a crucial step in helping student move towards the acquisitions of idioms and the development of native-like proficiency.

Frequently occurring words and phrases: As used in the ELP Standards, this refers to words and phrases used commonly in the classroom and to everyday language used in schools. It is important to note that this does not refer to the Top 100 High-Frequency Words (e.g., “the,” “a,” “and,” “but”). The term “basic” is not used in the ELP Standards because a term that is basic to one person may not be basic to another; acquisition of specific words and phrases depends on exposure and experiences.

Grade appropriate: As used in the ELP Standards, this refers to level of content and text complexity in relation to CCR standards’ requirements for a particular grade level or grade span. (See Appendix A of the CCSS for ELA & Literacy and Defining the Core.)

Idioms: An idiom is an expression that cannot be understood from the meanings of its component words but has a meaning of its own. Usually that meaning is derived from the history of the language and culture in which it is used. Students’ acquisition of idioms progresses from literal meanings to figurative and metaphorical meanings.

- **Transparent idioms** are expressions in which the literal meaning is clearly linked to the figurative meaning, e.g., *give the green light*, *break the ice*.
- **Semi-transparent idioms** are expressions in which the link between literal and figurative meaning is less obvious, e.g., *beat a dead horse*, *save one’s breath*.
- **Opaque idioms** are expressions with an undetectable link between literal and figurative language, e.g., *pull one’s leg*, *kick the bucket*.

Inflectional ending: A short suffix added to the end of a word to alter its meaning. In this document, the term refers to endings such as -s, -es, -ing, and -ed.

Inflectional forms: The forms of a word that include alteration of the word to indicate singular or plural, verb tense, and verb aspect. Inflected or inflectional forms also include irregular verbs (e.g. sing – sang – sung) and irregular plural nouns (e.g. mouse – mice).
**Informational text:** Text with a primary purpose to inform the reader about the natural or social world (includes explanatory text). See Appendix A of the CCSS ELA & Literacy Standards.

**Nonverbal communication:** As used in the ELP Standards, this term refers to the process of communication through sending and receiving wordless (mostly visual) cues between people. Examples of nonverbal communication in the ELP Standards may include gestures, nods, thumbs up or down, or facial expressions.

**Organize:** In the ELP Standards, refers to discourse that conveys temporal, causal, categorical, or other logical relationships that are consistent with the author’s apparent purpose in conveying information, narrating a story, making a persuasive argument, or some other emergent discourse form.

**Productive language skills:** Skills involved in producing language in spoken or written form. This modality “places the learner as speaker [and/or] writer for a ‘distant’ audience (one with whom interaction is not possible or is limited). The communication is set for a specified audience, has purpose, and generally abides by rules of genre or style. It is a planned or formalized speech act or written document, and the learner has an opportunity to draft, get feedback, and revise it before publication or broadcast” (Phillips, 2008, p. 96).

**Receptive language skills:** Skills involved in interpreting and comprehending spoken or written language. This modality “refers to the learner as a reader [and/or] listener/viewer working with ‘text’ whose author or deliverer is not present or accessible. It presumes that the interaction is with authentic written or oral documents where language input is meaningful and content laden. The learner brings background knowledge, experience, and appropriate interpretive strategies to the task, to promote understanding of language and content in order to develop a personal reaction” (Phillips, 2008, p. 96).

**Referent:** The thing that a word or phrase denotes or stands for; examples may include abstractions or physical examples.

**Recognize:** As used in the ELP Standards, this verb refers to instances when a student might recognize the meaning of the words, using verbal communication or non-verbal communication.

**Registers:** Distinguishable patterns of communication based upon well-established language practices, such as the language used in subject-area classrooms. Registers are a “recognizable kind of language particular to specific functions and situation. A well-known non-academic example is sports announcer talk” (Ferguson, 1983, p. 155).

**Research projects:**
- **Short research project:** An investigation intended to address a narrowly tailored query in a brief period of time, as in a few class periods or a week of instructional time.
- **More sustained research project:** An investigation intended to address a relatively expansive query using several sources over an extended period of time, as in a few weeks of instructional time.
**Scaffolding:** As defined in Appendix A of the CCSS ELA & Literacy Standards, this refers to guidance or assistance provided to students by a teacher, another adult, or a more capable peer, enabling the students to perform tasks that they otherwise would not be able to perform alone, with the goal of fostering the students’ capacity to perform the tasks on their own later on. Pedagogically, a scaffold is the support offered to students so that they can successfully engage in activity beyond their current ability to perform independently. Specific scaffolds temporarily support the development of understandings as well as disciplinary (and language) practices. Once the development takes place, the scaffolds are removed and new ones may be erected, if needed, to support new needed developmental work. For more information, see Walqui et al. (2013).

**Sentence structures:** As used in the ELP Standards and the Proficiency Level Descriptors, language structures include simple, compound, complex sentences, and the range of other language structures.

**Simple:** As used in the ELP Standards, this generally refers to the grammatical structure of a phrase, sentence, or text relative to its complexity or density. A “simple” sentence may use subject+verb+object construction without any embellishments.

**Source:** As used in the ELP Standards, this refers to speech or text used largely for informational purposes, as in research.

**SP:** The NGSS Science and Engineering Practices. The practices describe the behaviors that scientists engage in as they investigate and build models and theories about the natural world and the key set of engineering practices that engineers use as they design and build models and systems. The *Science and Engineering Practices* “describe behaviors that scientists engage in as they investigate and build models and theories about the natural world” (NGSS, 2013). As noted in Appendix F of the NGSS (NGSS Lead States, 2013), chapter three of the *Science Framework for K-12 Science Education* (NRC, 2012) provides background on the development of the *Science and Engineering Practices*. For more information and examples, see Bybee (2011).

**Variety of topics:** As used in the ELP Standards this refers to a range of topics that may be either familiar or unfamiliar to the student (i.e., requiring support to build the student’s background knowledge or particular context knowledge).

**Visual aids:** As used in the ELP Standards, this refers to pictures, realia (objects used in real life), sketches, diagrams, labeled pictures, and picture dictionaries.

**Vocabulary:** A set of words, phrases, or expressions, within a language, that is familiar to a person. (See the PLDs for specific vocabulary expectations by the end of each ELP level.)

- **Academic vocabulary** (see also Appendix A of the CCSS for ELA & Literacy, p. 33):
  - **General academic words and phrases:** Vocabulary common to written texts but not commonly a part of speech; as used in the ELP Standards, analogous to Tier Two words and phrases. Bailey & Heritage (2010) refer to this as “school navigational language.”
• **Content-specific words and phrases**: Words and phrases appropriate to the topic or specific to a particular field of study. Sometimes referred to as “terms.” (Terms are words and phrases that are given specific meanings in specific contexts.) Bailey & Heritage (2010) refer to this as “curriculum content language.” As defined in Language standard 6 of Louisiana Student Standards for ELA, this refers to grade-appropriate general academic and domain-specific words and phrases, analogous to Tier Three words. (However, the ELP Connectors do not suggest that vocabulary taught to ELLs should be limited to only that defined by the CCSS.)

• **Three Tiers of Vocabulary**:
  
  - **Tier One**: Words acquired through everyday speech, usually learned in the early grades.
  
  - **Tier Two**: Academic words that appear across all types of text. These are often precise words that are used by an author in place of common words (e.g., “gallop” instead of “run”). They change meaning with use.
  
  - **Tier Three**: Domain-specific words that are specifically tied to content (e.g., “Constitution,” “lava”). These are typically the types of vocabulary words that are included in glossaries, highlighted in textbooks, and addressed by teachers. They are considered difficult words that are important to understanding content.

• **Frequently occurring vocabulary**: This includes common words and phrases, as well as idiomatic expressions.

• **Social vocabulary/language**: Cummins (2000) refers to this as “surface proficiency” and, in earlier iterations of his work, as Basic Interpersonal Communicative Skills (BICS).

**Wh- questions**: “Who,” “what,” “where,” “when,” “why,” and “how” questions.

**With prompting and support/with (some) guidance and support**: See **Scaffolding**.
