

Professional Development for Louisiana Leaders

Session Overview

In this session, Leaders will build on their familiarity with Zearn and refine how they will support school sites as they prepare to implement and monitor progress. Leaders will explore Zearn's flexible instructional materials, features of the educator and administrator accounts, and how to utilize the embedded Reports that capture real-time data to accelerate math learning for all students. Leaders will walk away with materials to turn-key and leverage at their school sites as they launch Zearn.
