

Accelerate Math Summer 2021

When planning for summer learning opportunities, systems should refer to the [Summer Learning Program Guidance for 2021](#).

Consider the following when selecting materials for math.

- Choose [high-quality instructional materials](#) in which teachers have been trained and are familiar.
- Review guidance provided by high-quality curriculum vendors.
- Strategically plan for students to engage in [prioritized content](#) to prepare students for grade level content during the next school year.

The **Acceleration Cycle** should be a routine part of math teachers' daily planning for summer learning. This cycle of continuous planning and responding to address student needs will allow educators to personalize learning as they move through the four phases: Diagnose, Plan, Deliver and Monitor. It is important to note that the cycle will be engaged in repeatedly over short periods of time at the cohort, class and tutoring group level. The [Eureka Acceleration Tools](#) are available to support the diagnose phase in grades 4 - Algebra I. Any other available student data should also be referenced, including but not limited to classwork, observational assessments, and exit tickets.

High-Quality Instructional Resources

Resources supporting Summer Accelerate Math should come from [high-quality instructional materials](#) in which teachers have been trained and are familiar. Consider guidance provided by high-quality curriculum vendors. Suggestions from the most widely implemented high-quality curricula are listed below.

Eureka Math

Eureka Math[®] teacher-writers created [Eureka Math Equip™](#), an adaptive digital diagnostic tool, to identify and bridge learning gaps through direct instruction videos and fluency practice—so students solidify essential foundational knowledge and are ready to succeed this fall. [Eureka Math Equip](#) determines each student’s last point of success with a concept and provides content tailored to that student’s particular needs.

Zearn

Zearn Math's [Summer Intensive Series](#) includes daily lessons for 12 weeks of targeted math intervention, designed to build knowledge on the most critical content of each grade and set the foundation for a strong start for next school year. Each series includes dynamic digital lessons on [prioritized content](#) that students complete independently and resources for teachers and tutors to use alongside each lesson.

Sample Summer Learning Scope and Sequences

For sample planning scenarios, view the grade-level pages linked below. It is important to note that these scenarios are examples and should not be implemented without thoughtful consideration of the context of each system and of the unique needs of learners. These sequences are *samples* intended to guide individualized decisions based on the structure, resources, and needs of each school and system. Ongoing formative assessment should be used to gauge areas for targeted support and to inform planning for individual students. Systems should review all available information and student data to make the most informed summer scope and sequence plans.

Summer math teachers should maintain planning practices consistent with regular school year instruction. To assist in planning for available time during summer programs, a [sample lesson annotation](#) has been provided.

Important Notes on Implementation

The resources in this document are designed for use during summer 2021 ONLY to accelerate student learning with the goal of accessing grade-level content by the beginning of the 2021-2022 school year.

Rising Grade 1

Below is a recommendation for content with which to engage **incoming 2021-2022 grade 1 students** during the summer of 2021. Content was identified according to the major work of the grade as determined by the [Kindergarten Math Focus Document](#). Grade 1 transition experiences should be hands-on and focused on building conceptual understanding.

Sample Calendars

This sample is a possible example of prioritized content presenting two lessons a day over four weeks of instruction. There are many ways to approach a summer lesson scope and sequence. Below is one example.

Sample - 90 minutes of math - Two 45 minute lessons per day					
	Monday	Tuesday	Wednesday	Thursday	Friday
Week 1	2.2, 2.3	2.4, 2.5	2.6, 2.7	2.8, 2.9	2.10, 2.11
Week 2	2.12, 2.13	4.2, 4.3	4.4, 4.5	4.6, 4.7	4.8, 4.9
Week 3	4.10, 4.11	4.12	6.1, 6.2	6.3, 6.4	6.5, 6.6
Week 4	6.7, 6.8	6.9, 6.10	6.11, 6.12	flex	flex

Rising Algebra I - Eureka Math

Below is a recommendation for content with which to engage **incoming 2021-2022 grade 9 students** during the summer of 2021. Content was identified according to guidance within the [Louisiana Important Prerequisite Math Standards](#) document.

Eureka Math Module	Module Title	Important Prerequisite Standards
Grade 8 Module 4	Linear Equations	8.EE.B.5, 8.EE.B.6, 8.EE.C.7
Grade 8 Module 5	Examples of functions from Geometry	8.F.A.1, 8.F.A.2, 8.F.A.3
Grade 8 Module 6	Linear Functions	8.F.B.4, 8.F.b.5
