

1. Introduction

LEAP 360 Diagnostic Assessments in English language arts and mathematics are available for grades 3-8, English I, English II, Algebra I, and Geometry. These optional diagnostic assessments are designed to help educators determine readiness for new grade level learning and support meaningful and ambitious goal setting for student learning targets.

Computer-based diagnostic assessments (CBT) for grades 3 through 12 are administered through the Data Recognition Corporation (DRC) INSIGHT testing platform. Paper-based diagnostic assessments (PBT) for grades 3 and 4 are available in [eDIRECT- General Information>Documents>Diagnostic>Paper Tests](#).

2. Diagnostic Assessment and Instructional Guidance

[A Teacher’s Guide to LEAP 360](#) provides teachers with detailed guidance and tools that help teachers use the diagnostic assessments to support instructional goals. These tools provide information about general test structure, item types, recommended uses, interpreting and using results, general cautions, and additional resources.

Using Google Chrome, teachers may now use the [LEAP 360 Diagnostic Assessment Teacher Access](#) link. Below are the user names and passwords.

LEAP 360 English Language Arts Diagnostic Assessment Teacher Access

3. Test Administration

The [eDIRECT User Guide](#) provides directions for administration of the diagnostic assessments. The following tasks must be completed in eDIRECT prior to administering the diagnostic assessments: upload users, create test sessions, generate and print test tickets, and review resources in [eDIRECT](#).

4. Scoring

General Scoring Information

Computer-based diagnostic assessments are scored using a combination of automated and teacher scoring. Multiple choice, evidence-based selected response items, and technology-enhanced items are automatically scored. Written responses to prose constructed response and constructed- and extended-response questions are scored by teachers. The [eDIRECT User Guide](#)- Educator Scoring section explains how to access and use the Educator Scoring application to score constructed response and extended-response items for the computer-based tests. Paper-based diagnostic assessments are scored by teachers using answer keys.

Teacher Study Guide

For each diagnostic assessment, an answer key with alignment information, scoring guide, sample papers (if applicable), and copy of the test are available in the Teacher Study Guide posted in [eDIRECT](#) in the General Information tab under Documents. The answer keys include answers to multiple-choice and evidence-based selected response items. The scoring guides include rubrics for scoring written responses.

5. Reporting

The [eDIRECT User Guide](#)- Report Delivery Menu section explains how to access the computer-based test reports in eDIRECT and gives an explanation of the reports provided. The following reports will be available for diagnostic assessments:

- School Summary Reports
- School List Reports
- Test Session Summary Reports
- Test Session List Reports
- Test Session Response Maps
- Student Response Maps
- Individual Summary Reports

If districts or schools have questions about online test setup or administration, please contact Louisiana Customer Service at 1-888-718-4846 or LAHelpDesk@datarecognitioncorp.com. Questions can also be sent to the LDOE by calling the Assessment Hotline at 1-844-268-7420 or emailing assessment@la.gov.

Louisiana remains committed to reducing student testing time on state-level assessments, including limiting testing to never more than 2% of instructional time and limiting end-of-year tests to never more than one week, but also reducing district-level assessment minutes while improving the quality of such benchmarking tools. LEAP 360 supports districts and schools in its collective effort to significantly reduce time on assessments. LEAP 360 assessment tools should not be used in addition to other district benchmarking but rather in the place of those previous assessments. To support districts with system-wide test reduction, LDOE has led assessment audits with districts, utilizing [assessment inventory resources](#) to help districts evaluate the amount and quality of district and school assessments to reduce testing time.
