Registration Procedures 2020-2021

updated 8/17/20
ONLY school systems/schools may register students with providers.

Laws concerning student privacy must be followed between the school system/school and the provider in the registration process. For more information on establishing a system of data governance, please see Louisiana's Data Governance and Student Privacy Guidebook. For more information email ldedata@la.gov. Each school system has its own policy for student privacy and providers, and the school system should communicate those protocols before any student information is used when registering students.

School systems/schools report final enrollment information in the LDOE system.
