# Registration Procedures

updated 8/26/24

- ONLY school systems/schools may register students with providers.
- Laws concerning student privacy must be followed between the school system/school and the provider in the registration process. For more information on establishing a system of data governance, please see [Louisiana’s Data Governance and Student Privacy Guidebook](#). For more information email [ldedata@la.gov](mailto:ldedata@la.gov). Each school system has its own policy for student privacy and providers, and the school system should communicate those protocols before any student information is used when registering students.
- School systems/schools report final enrollment information in the LDOE system.
