

# CONTINUOUS EDUCATION FOR STUDENTS WITH DISABILITIES

## • ACCESSIBILITY OF INSTRUCTIONAL MATERIALS •

### INTRODUCTION

When planning for continuous learning, school systems must ensure that, to the extent possible, students with disabilities are provided with equitable access to high-quality instruction and materials. This guide builds on the [Continuous Learning Toolkit](#) and is intended to help school systems expand accessibility across continuous learning formats. Whether school systems choose to implement low-tech or high-tech approaches to continuous learning, they should make high quality instructional materials accessible to students with disabilities as much as possible. School systems should continue to prioritize the use of [high quality core instructional materials](#) for all students while also providing flexibility, based on student need. It is critical that materials are provided in a manner that allows students with disabilities the same level of access to high quality instructional materials as their peers.
