

Strong mathematics instruction contains the following elements:

Title: Algebra I, Geometry, and Algebra II

Grade: 9-11

Publisher: Carnegie Learning, Inc.

Copyright: 2012

Overall Rating: **Tier III, Not representing quality**

[Tier I](#), [Tier II](#), [Tier III](#) Elements of this grade band:

STRONG	WEAK
<b>STRONG</b>	<b>WEAK</b>
<u>Focus on Major Work</u> (Non-Negotiable)	<u>Consistent, Coherent Content</u> (Non-Negotiable)
<u>Rigor and Balance</u> (Non-Negotiable)	<u>Practice-Content Connections</u> (Non-Negotiable)

Each set of submitted materials was evaluated for alignment with the standards beginning with a review of the indicators for the non-negotiable criteria. If those criteria were met, a review of the other criteria ensued.

**Tier 1 ratings** received a “Yes” for all Criteria 1-7.

**Tier 2 ratings** received a “Yes” for all non-negotiable criteria (Criteria 1 – 4), but at least one “No” for the remaining criteria.

**Tier 3 ratings** received a “No” for at least one of the non-negotiable criteria.

Click below for complete grade-level reviews:

[Algebra I \(Tier 3\)](#)

[Geometry \(Tier 3\)](#)

[Algebra II \(Tier 3\)](#)

Strong mathematics instruction contains the following elements:

Title: Algebra 1

Grade: 9

Publisher: Carnegie Learning, Inc.

Copyright: 2012

Overall Rating: Tier III, Not representing quality

Tier I, Tier II, Tier II Elements of this review:

STRONG	WEAK
<a href="#">Focus on Major Work</a> (Non-Negotiable)	<a href="#">Consistent, Coherent Content</a> (Non-Negotiable)
<a href="#">Rigor and Balance</a> (Non-Negotiable)	<a href="#">Practice-Content Connections</a> (Non-Negotiable)

To evaluate each set of submitted materials for alignment with the standards, begin by reviewing the indicators listed in Column 2 for the non-negotiable criteria in Section I. If there is a “Yes” for all indicators in Column 2 for Section I, then the materials receive a “Yes” in Column 1. If there is a “No” for any indicator in Column 2 for Section I, then the materials receive a “No” in Column 1.

For Section II, begin by reviewing the required indicators in Column 2 for each criterion. If there is a “Yes” for all required indicators in Column 2, then the materials receive a “Yes” in Column 1. If there is a “No” for any required indicators in Column 2, then the materials receive a “No” in Column 1.

**Tier 1 ratings** receive a “Yes” in Column 1 for Criteria 1-7.

**Tier 2 ratings** receive a “Yes” in Column 1 for all non-negotiable criteria (Criteria 1 – 4), but at least one “No” in Column 1 for the remaining criteria.

**Tier 3 ratings** receive a “No” in Column 1 for at least one of the non-negotiable criteria.

CRITERIA	INDICATORS OF SUPERIOR QUALITY	MEETS METRICS (Y/N)	JUSTIFICATION/ COMMENTS
<b>SECTION I: NON-NEGOTIABLE CRITERIA: Submissions must meet all of the non-negotiable criteria to move to tier 2.</b>			
<p><b>Non-Negotiable 1. FOCUS IN HIGH SCHOOL:</b> In any single course, students and teachers using the materials as designed spend the majority of their time developing knowledge and skills that are widely applicable as prerequisites for postsecondary education.<sup>1, 2</sup></p> <p>For courses that do not include Geometry standards, metrics 1a and 1b must be met. For courses including Geometry standards, all three of the metrics must be met.</p> <p><input checked="" type="checkbox"/> Yes    <input type="checkbox"/> No</p>	<p><b>REQUIRED</b> <b>1a)</b> In any single course, students spend at least 50% of their time on <a href="#">Widely Applicable Prerequisites</a> for postsecondary education.<sup>3</sup></p>	Yes	Student work corresponds to standards written for high school math. Students spend the majority of their time completing work widely applicable as prerequisites for postsecondary education. In the student book and teacher’s resources, at the front of each chapter, the standards are listed for that chapter and each lesson.
	<p><b>REQUIRED</b> <b>1b)</b> There are problems at a level of sophistication appropriate to high school (beyond mere review of middle school topics) that involve the application of knowledge and skills from grades 6-8 including<sup>4</sup>:</p> <ul style="list-style-type: none"> <li>• Applying ratios and proportional relationships.</li> <li>• Applying percentages and unit conversions, e.g., in the context of complicated measurement problems involving quantities with derived or compound units (such as mg/mL, kg/m<sup>3</sup>, acre-feet, etc.).</li> <li>• Applying basic function concepts, e.g., by interpreting the features of a graph in the context of an applied problem.</li> <li>• Applying concepts and skills of geometric measurement e.g., when analyzing a diagram or schematic.</li> <li>• Applying concepts and skills of basic statistics and probability (see 6–8.SP).</li> <li>• Performing rational number arithmetic fluently.</li> </ul>	Yes	Skills used surpass the prerequisites required for 9 <sup>th</sup> grade. For example, in 8 <sup>th</sup> grade students are expected to create and solve linear equations. In chapter 6 of Carnegie Learning Algebra 1 students are expected to create and solve a system of linear equations an extension of solving and creating one linear equation.
	<p><b>REQUIRED (as applicable)</b> <b>1c)</b> For courses that include standards from the Geometry conceptual category, student work in Geometry significantly involves applications/modeling as well as geometry applications that use algebra skills.<sup>5</sup></p>	N/A	Not Applicable – Only standards related to Algebra are in Algebra 1, Geometry standards are designated with a G, and none are assigned to Algebra 1

<sup>1</sup> Refer also to criterion #1 in the High School [Publishers’ Criteria](#) for the Common Core State Standards for Mathematics (Spring 2013).

<sup>2</sup> If materials show time in both block and standard 'days,' choose either but remain consistent.

<sup>3</sup> For more information on the Widely Applicable Prerequisites, see Table 1 on Page 8 of the High School [Publishers’ Criteria](#) for the Common Core State Standards for Mathematics (Spring 2013).

<sup>4</sup> Information excerpted from Table 1 on Page 8 of the High School [Publishers’ Criteria](#) for the Common Core State Standards for Mathematics (Spring 2013).

<sup>5</sup> Since the Geometry category itself contains relatively fewer Widely Applicable Prerequisites, this criterion is important to help foster students’ college and career readiness.

CRITERIA	INDICATORS OF SUPERIOR QUALITY	MEETS METRICS (Y/N)	JUSTIFICATION/ COMMENTS
<b>SECTION I (continued): NON-NEGOTIABLE CRITERIA</b>			
<b>Non-Negotiable 2. CONSISTENT, COHERENT CONTENT</b> Each course’s instructional materials are coherent and consistent with the content in the standards. <sup>6</sup>  <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	<b>REQUIRED</b> <b>2a) Giving all students extensive work with course-level problems:</b> Review of material from previous grades and courses is clearly identified as such to the teacher, and teachers and students can see what their specific responsibility is for the current year.	Yes	Students are provided an ample number of grade-level problems although material from previous grades is not identified as such to the teacher.
	<b>REQUIRED</b> <b>2b) Relating course-level concepts explicitly to prior knowledge from earlier grades and courses:</b> The materials are designed so that prior knowledge becomes reorganized and extended to accommodate the new knowledge.	No	Materials do not explicitly indicate prior knowledge learned in middle school and how it applies to the current coursework
<b>Non-Negotiable 3. RIGOR AND BALANCE:</b> Each grade’s instructional materials reflect the balances in the Standards and help students meet the Standards’ rigorous expectations, by helping students develop conceptual understanding, procedural skill and fluency, and application. <sup>7</sup>  <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	<b>REQUIRED</b> <b>3a) Attention to Conceptual Understanding:</b> Materials develop conceptual understanding of key mathematical concepts, especially where called for in specific content standards or cluster headings by amply featuring high-quality conceptual problems and questions.	Yes	Students are asked to explain understanding and reasoning throughout the coursework. After each introduced concepts, students are expected to practice for understanding as the next step. Students are asked to reason by explanations.
	<b>REQUIRED</b> <b>3b) Attention to Procedural Skill and Fluency:</b> Materials give attention throughout the year to individual standards that set an expectation of procedural skill and fluency. In higher grades, sufficient practice with algebraic operations is provided in order for students to meet all of the expectations set in the Standards as a whole.	Yes	Two separate practice sets are given for each lesson to develop procedural skill and fluency to mastery of the content.
	<b>REQUIRED</b> <b>3c) Attention to Applications:</b> Materials are designed so that teachers and students spend sufficient time working with engaging applications/modeling. While modeling is a mathematical practice at every grade, it is more prominent and enhanced in high school with more elements of the modeling cycle present.	Yes	Materials attend thoroughly to those places in the content standards where expectations for multi-step and real-world problems are explicit. Lessons contain examples of application problems associated with the content of the lesson to be modeled during instruction.
	<b>REQUIRED</b> <b>3d) Balance:</b> The three aspects of rigor are not always treated together, and are not always treated separately	Yes	Lessons align to the three components of rigor: Conceptual understanding, procedural skills and fluency, and application as needed in each lesson based on the standard’s need for each particular aspect of rigor. The student book contains mostly application and conceptual understanding, however, two additional practice sets are included for each lesson that cover procedural skills and fluency.

<sup>6</sup> Refer also to criterion #3 in the High School [Publishers’ Criteria](#) for the Common Core State Standards for Mathematics (Spring 2013).

<sup>7</sup> Refer also to criterion #2 in the High School [Publishers’ Criteria](#) for the Common Core State Standards for Mathematics (Spring 2013).

CRITERIA	INDICATORS OF SUPERIOR QUALITY	MEETS METRICS (Y/N)	JUSTIFICATION/ COMMENTS
<b>SECTION I (continued): NON-NEGOTIABLE CRITERIA</b>			
<p><b>Non-Negotiable 4. PRACTICE-CONTENT CONNECTIONS:</b> Materials meaningfully connect the Standards for Mathematical Content and the Standards for Mathematical Practice.<sup>8</sup></p> <p><input type="checkbox"/> Yes    <input checked="" type="checkbox"/> No</p>	<p><b>REQUIRED</b> <b>4a)</b> The materials connect the Standards for Mathematical Practice and the Standards for Mathematical Content.</p>	<p><b>No</b></p>	<p>Mathematical practices are not listed in each lesson and problems are not identified that exemplify mathematical practices. Some problems use concepts from mathematical practices such as justifying and critiquing the reasoning of others, but not all mathematical practices are used.</p>
	<p><b>REQUIRED</b> <b>4b)</b> The developer provides a description or analysis, aimed at evaluators, which shows how materials meaningfully connect the Standards for Mathematical Practice to the Standards for Mathematical Content within each applicable course.</p>	<p><b>No</b></p>	<p>Mathematical Practices are discussed in the Teacher’s Implementation Guide. This discussion, however, focuses more on features of the textbook that connect to the math practices instead of explaining the connections between the Standards for Mathematical Content and Standards for Mathematical Practice in Algebra I.</p> <p>The material does not provide a justification when Mathematical Practices are used and how it relates the lesson content.</p>

<sup>8</sup> Refer also to criterion #5 in the High School [Publishers’ Criteria](#) for the Common Core State Standards for Mathematics (Spring 2013).

CRITERIA	INDICATORS OF SUPERIOR QUALITY	MEETS METRICS (Y/N)	JUSTIFICATION/ COMMENTS
<b>SECTION II: ADDITIONAL ALIGNMENT CRITERIA AND INDICATORS OF QUALITY</b>			
<p><b>Additional Criterion 5. ALIGNMENT CRITERIA FOR STANDARDS FOR MATHEMATICAL CONTENT:</b> Materials foster focus and coherence by linking topics within grades (across domains and clusters). Courses are designed based on the content in the standards.</p> <p><input type="checkbox"/> Yes    <input type="checkbox"/> No</p>	<p><b>REQUIRED</b> <b>5a)</b> Materials base courses on the content specified in the standards (Algebra I, Geometry, and Algebra II).<sup>9</sup></p>		Not evaluated. Non-negotiable criteria were not met.
	<p><b>REQUIRED</b> <b>5b)</b> Materials include problems and activities that serve to connect two or more clusters in a domain, or two or more domains in a category, or two or more categories, in cases where these connections are natural and important.<sup>10, 11</sup></p>		Not evaluated. Non-negotiable criteria were not met.
	<p><b>5c)</b> Materials include learning objectives that are visibly shaped by CCSSM cluster and domain headings.<sup>10</sup></p>		Not evaluated. Non-negotiable criteria were not met.
	<p><b>5d)</b> Materials preserve the focus, coherence, and rigor of the Standards even when targeting specific objectives.<sup>10</sup></p>		Not evaluated. Non-negotiable criteria were not met.
<p><b>Additional Criterion 6. ALIGNMENT CRITERIA FOR STANDARDS FOR MATHEMATICAL PRACTICE:</b> Aligned materials make meaningful and purposeful connections that enhance the focus and coherence of the standards rather than detract from the focus and include additional content/skills to teach which are not included in the standards.</p> <p><input type="checkbox"/> Yes    <input type="checkbox"/> No</p>	<p><b>REQUIRED</b> <b>6a)</b> Careful Attention to Each Practice Standard: Materials attend to the full meaning of each practice standard.<sup>12</sup></p>		Not evaluated. Non-negotiable criteria were not met.
	<p><b>REQUIRED</b> <b>6b)</b> Materials provide sufficient opportunities for students to construct viable arguments and critique the arguments of other concerning key course-level mathematics that is detailed in the content standards (cf. MP.3).<sup>13</sup></p>		Not evaluated. Non-negotiable criteria were not met.
	<p><b>REQUIRED</b> <b>6c)</b> Materials engage students in problem solving as a form of argument, attending thoroughly to places in the standards that explicitly set expectations for multi-step problems.<sup>13</sup></p>		Not evaluated. Non-negotiable criteria were not met.
	<p><b>6d)</b> Materials explicitly attend to the specialized language of mathematics.<sup>13</sup></p>		Not evaluated. Non-negotiable criteria were not met.

<sup>9</sup> Refer also to criterion #3 in the HS [Publishers' Criteria](#) for the Common Core State Standards for Mathematics (Spring 2013).

<sup>10</sup> Refer also to criterion #4 in the HS [Publishers' Criteria](#) for the Common Core State Standards for Mathematics (Spring 2013).

<sup>11</sup> Refer to the standards for each course found in the [Teacher Support Library](#).

<sup>12</sup> Refer also to criterion #7 in the HS [Publishers' Criteria](#) for the Common Core State Standards for Mathematics (Spring 2013).

<sup>13</sup> Refer also to criterion #8 in the HS [Publishers' Criteria](#) for the Common Core State Standards for Mathematics (Spring 2013).

CRITERIA	INDICATORS OF SUPERIOR QUALITY	MEETS METRICS (Y/N)	JUSTIFICATION/ COMMENTS
<b>SECTION II (continued): ADDITIONAL ALIGNMENT CRITERIA AND INDICATORS OF QUALITY</b>			
<p><b>Additional Criterion 7. INDICATORS OF QUALITY:</b> Quality materials should exhibit the indicators outlined here in order to give teachers and students the tools they need to meet the expectations of the standards.</p> <p><input type="checkbox"/> Yes      <input type="checkbox"/> No</p>	<p><b>REQUIRED</b> <b>7a)</b> Materials support the uses of technology as called for in the standards.</p>		Not evaluated. Non-negotiable criteria were not met.
	<p><b>REQUIRED</b> <b>7b)</b> The underlying design of the materials distinguishes between problems and exercises. In essence the difference is that in solving problems, students learn new mathematics, whereas in working exercises, students apply what they have already learned to build mastery. Each problem or exercise has a purpose.</p>		Not evaluated. Non-negotiable criteria were not met.
	<p><b>REQUIRED</b> <b>7c)</b> Design of assignments is not haphazard: exercises are given in intentional sequences.</p>		Not evaluated. Non-negotiable criteria were not met.
	<p><b>REQUIRED</b> <b>7d)</b> There is variety in what students produce. For example, students are asked to produce answers and solutions, but also, in a grade-appropriate way, arguments and explanations, diagrams, mathematical models, etc.</p>		Not evaluated. Non-negotiable criteria were not met.
	<p><b>REQUIRED</b> <b>7e)</b> There are separate teacher materials that support and reward teacher study including, but not limited to: discussion of the mathematics of the units and the mathematical point of each lesson as it relates to the organizing concepts of the unit, discussion on student ways of thinking and anticipating a variety of students responses, guidance on lesson flow, guidance on questions that prompt students thinking, and discussion of desired mathematical behaviors being elicited among students.</p>		Not evaluated. Non-negotiable criteria were not met.
	<p><b>REQUIRED</b> <b>7f)</b> Support for English Language Learners and other special populations is thoughtful and helps those students meet the same standards as all other students. The language in which problems are posed is carefully considered.</p>		Not evaluated. Non-negotiable criteria were not met.
	<p><b>7g)</b> There is variety in the pacing and grain size of content coverage.<sup>14</sup></p>		Not evaluated. Non-negotiable criteria were not met.
	<p><b>7h)</b> Lessons are thoughtfully structured and support the teacher in leading the class through the learning paths at hand, with active participation by all students in their own learning and in the learning of their classmates.</p>		Not evaluated. Non-negotiable criteria were not met.
	<p><b>7i)</b> Manipulatives are faithful representations of the mathematical objects they represent and are connected to written methods.</p>		Not evaluated. Non-negotiable criteria were not met.

<sup>14</sup> Refer also to page 16 in the High School [Publishers' Criteria](#) for the Common Core State Standards for Mathematics (Spring 2013).

**Tier 1 ratings** receive a “Yes” in Column 1 for Criteria 1-7.

**Tier 2 ratings** receive a “Yes” in Column 1 for all non-negotiable criteria (Criteria 1 – 4), but at least one “No” in Column 1 for the remaining criteria.

**Tier 3 ratings** receive a “No” in Column 1 for at least one of the non-negotiable criteria.

FINAL EVALUATION			
Compile the results for Sections I and II to make a final decision for the material under review.			
Section	Criteria	Y/N	Final Justification/Comments
<b>I: Non-Negotiables</b>	1. Focus on Major Work	<b>Yes</b>	Course materials contain applicable content for the subject matter.
	2. Consistent, Coherent Content	<b>No</b>	Review material and prior knowledge is not addressed within the text
	3. Rigor and Balance	<b>Yes</b>	Coursework provides an adequate balance of rigor as determined by each standard.
	4. Practice-Content Connections	<b>No</b>	Mathematical practices are not listed and identified in each lesson. However, some mathematical practices are used throughout the text.
<b>II: Additional Alignment Criteria and Indicators of Quality</b>	5. Alignment Criteria for Standards for Mathematical Content		Not evaluated. Non-negotiable criteria were not met.
	6. Alignment Criteria for Standards for Mathematical Practice		Not evaluated. Non-negotiable criteria were not met.
	7. Indicators of Quality		Not evaluated. Non-negotiable criteria were not met.
<b>FINAL DECISION FOR THIS MATERIAL: <u>Tier III, Not representing quality</u></b>			

Strong mathematics instruction contains the following elements:

Title: Geometry

Grade: 10

Publisher: Carnegie Learning, Inc.

Copyright: 2012

Overall Rating: Tier III, Not representing quality

Tier I, Tier II, Tier II Elements of this review:

STRONG	WEAK
<a href="#">Focus on Major Work</a> (Non-Negotiable)	<a href="#">Consistent, Coherent Content</a> (Non-Negotiable)
<a href="#">Rigor and Balance</a> (Non-Negotiable)	<a href="#">Practice-Content Connections</a> (Non-Negotiable)

To evaluate each set of submitted materials for alignment with the standards, begin by reviewing the indicators listed in Column 2 for the non-negotiable criteria in Section I. If there is a “Yes” for all indicators in Column 2 for Section I, then the materials receive a “Yes” in Column 1. If there is a “No” for any indicator in Column 2 for Section I, then the materials receive a “No” in Column 1.

For Section II, begin by reviewing the required indicators in Column 2 for each criterion. If there is a “Yes” for all required indicators in Column 2, then the materials receive a “Yes” in Column 1. If there is a “No” for any required indicators in Column 2, then the materials receive a “No” in Column 1.

**Tier 1 ratings** receive a “Yes” in Column 1 for Criteria 1-7.

**Tier 2 ratings** receive a “Yes” in Column 1 for all non-negotiable criteria (Criteria 1 – 4), but at least one “No” in Column 1 for the remaining criteria.

**Tier 3 ratings** receive a “No” in Column 1 for at least one of the non-negotiable criteria.

CRITERIA	INDICATORS OF SUPERIOR QUALITY	MEETS METRICS (Y/N)	JUSTIFICATION/ COMMENTS
<b>SECTION I: NON-NEGOTIABLE CRITERIA: Submissions must meet all of the non-negotiable criteria to move to tier 2.</b>			
<p><b>Non-Negotiable 1. FOCUS IN HIGH SCHOOL:</b> In any single course, students and teachers using the materials as designed spend the majority of their time developing knowledge and skills that are widely applicable as prerequisites for postsecondary education.<sup>1, 2</sup> For courses that do not include Geometry standards, metrics 1a and 1b must be met. For courses including Geometry standards, all three of the metrics must be met.</p> <p><input checked="" type="checkbox"/> Yes    <input type="checkbox"/> No</p>	<p><b>REQUIRED</b> <b>1a)</b> In any single course, students spend at least 50% of their time on <a href="#">Widely Applicable Prerequisites</a> for postsecondary education.<sup>3</sup></p>	Yes	Student work corresponds to standards written for high school math. Students spend the majority of their time completing work widely applicable as prerequisites for postsecondary education. In the student book and teacher’s resources, at the front of each chapter, the standards are listed for that chapter and each lesson.
	<p><b>REQUIRED</b> <b>1b)</b> There are problems at a level of sophistication appropriate to high school (beyond mere review of middle school topics) that involve the application of knowledge and skills from grades 6-8 including<sup>4</sup>:</p> <ul style="list-style-type: none"> <li>• Applying ratios and proportional relationships.</li> <li>• Applying percentages and unit conversions, e.g., in the context of complicated measurement problems involving quantities with derived or compound units (such as mg/mL, kg/m<sup>3</sup>, acre-feet, etc.).</li> <li>• Applying basic function concepts, e.g., by interpreting the features of a graph in the context of an applied problem.</li> <li>• Applying concepts and skills of geometric measurement e.g., when analyzing a diagram or schematic.</li> <li>• Applying concepts and skills of basic statistics and probability (see 6–8.SP).</li> <li>• Performing rational number arithmetic fluently.</li> </ul>	Yes	Skills used surpass the prerequisites required for 9 <sup>th</sup> grade. For example, in 8 <sup>th</sup> grade students are expected to solve ratios and proportions. In chapter 12, students apply the principles of ratios and proportions to determine the segment lengths of secants, tangents, and chords.
	<p><b>REQUIRED (as applicable)</b> <b>1c)</b> For courses that include standards from the Geometry conceptual category, student work in Geometry significantly involves applications/modeling as well as geometry applications that use algebra skills.<sup>5</sup></p>	Yes	Student work in Geometry involves applications/modeling as well as applications that use algebra skills.

<sup>1</sup> Refer also to criterion #1 in the High School [Publishers’ Criteria](#) for the Common Core State Standards for Mathematics (Spring 2013).

<sup>2</sup> If materials show time in both block and standard 'days,' choose either but remain consistent.

<sup>3</sup> For more information on the Widely Applicable Prerequisites, see Table 1 on Page 8 of the High School [Publishers’ Criteria](#) for the Common Core State Standards for Mathematics (Spring 2013).

<sup>4</sup> Information excerpted from Table 1 on Page 8 of the High School [Publishers’ Criteria](#) for the Common Core State Standards for Mathematics (Spring 2013).

<sup>5</sup> Since the Geometry category itself contains relatively fewer Widely Applicable Prerequisites, this criterion is important to help foster students’ college and career readiness.

CRITERIA	INDICATORS OF SUPERIOR QUALITY	MEETS METRICS (Y/N)	JUSTIFICATION/ COMMENTS
<b>SECTION I (continued): NON-NEGOTIABLE CRITERIA</b>			
<p><b>Non-Negotiable 2. CONSISTENT, COHERENT CONTENT</b> Each course’s instructional materials are coherent and consistent with the content in the standards.<sup>6</sup></p> <p><input type="checkbox"/> Yes    <input checked="" type="checkbox"/> No</p>	<p><b>REQUIRED</b> <b>2a) Giving all students extensive work with course-level problems:</b> Review of material from previous grades and courses is clearly identified as such to the teacher, and teachers and students can see what their specific responsibility is for the current year.</p>	Yes	Students are provided an ample number of grade-level problems although material from previous grades and courses is not identified as such to the teacher.

<sup>11</sup> Refer to the standards for each course found in the [Teacher Support Library](#).

<sup>12</sup> Refer also to criterion #7 in the HS [Publishers' Criteria](#) for the Common Core State Standards for Mathematics (Spring 2013).

<sup>13</sup> Refer also to criterion #8 in the HS [Publishers' Criteria](#) for the Common Core State Standards for Mathematics (Spring 2013).

CRITERIA	INDICATORS OF SUPERIOR QUALITY	MEETS METRICS (Y/N)	JUSTIFICATION/ COMMENTS
<b>SECTION II (continued): ADDITIONAL ALIGNMENT CRITERIA AND INDICATORS OF QUALITY</b>			
<p><b>Additional Criterion 7. INDICATORS OF QUALITY:</b> Quality materials should exhibit the indicators outlined here in order to give teachers and students the tools they need to meet the expectations of the standards.</p> <p><input type="checkbox"/> Yes      <input type="checkbox"/> No</p>	<p><b>REQUIRED</b> <b>7a)</b> Materials support the uses of technology as called for in the standards.</p>		Not evaluated. Non-negotiable criteria were not met.
	<p><b>REQUIRED</b> <b>7b)</b> The underlying design of the materials distinguishes between problems and exercises. In essence the difference is that in solving problems, students learn new mathematics, whereas in working exercises, students apply what they have already learned to build mastery. Each problem or exercise has a purpose.</p>		Not evaluated. Non-negotiable criteria were not met.
	<p><b>REQUIRED</b> <b>7c)</b> Design of assignments is not haphazard: exercises are given in intentional sequences.</p>		Not evaluated. Non-negotiable criteria were not met.
	<p><b>REQUIRED</b> <b>7d)</b> There is variety in what students produce. For example, students are asked to produce answers and solutions, but also, in a grade-appropriate way, arguments and explanations, diagrams, mathematical models, etc.</p>		Not evaluated. Non-negotiable criteria were not met.
	<p><b>REQUIRED</b> <b>7e)</b> There are separate teacher materials that support and reward teacher study including, but not limited to: discussion of the mathematics of the units and the mathematical point of each lesson as it relates to the organizing concepts of the unit, discussion on student ways of thinking and anticipating a variety of students responses, guidance on lesson flow, guidance on questions that prompt students thinking, and discussion of desired mathematical behaviors being elicited among students.</p>		Not evaluated. Non-negotiable criteria were not met.
	<p><b>REQUIRED</b> <b>7f)</b> Support for English Language Learners and other special populations is thoughtful and helps those students meet the same standards as all other students. The language in which problems are posed is carefully considered.</p>		Not evaluated. Non-negotiable criteria were not met.
	<p><b>7g)</b> There is variety in the pacing and grain size of content coverage.<sup>14</sup></p>		Not evaluated. Non-negotiable criteria were not met.
	<p><b>7h)</b> Lessons are thoughtfully structured and support the teacher in leading the class through the learning paths at hand, with active participation by all students in their own learning and in the learning of their classmates.</p>		Not evaluated. Non-negotiable criteria were not met.
	<p><b>7i)</b> Manipulatives are faithful representations of the mathematical objects they represent and are connected to written methods.</p>		Not evaluated. Non-negotiable criteria were not met.

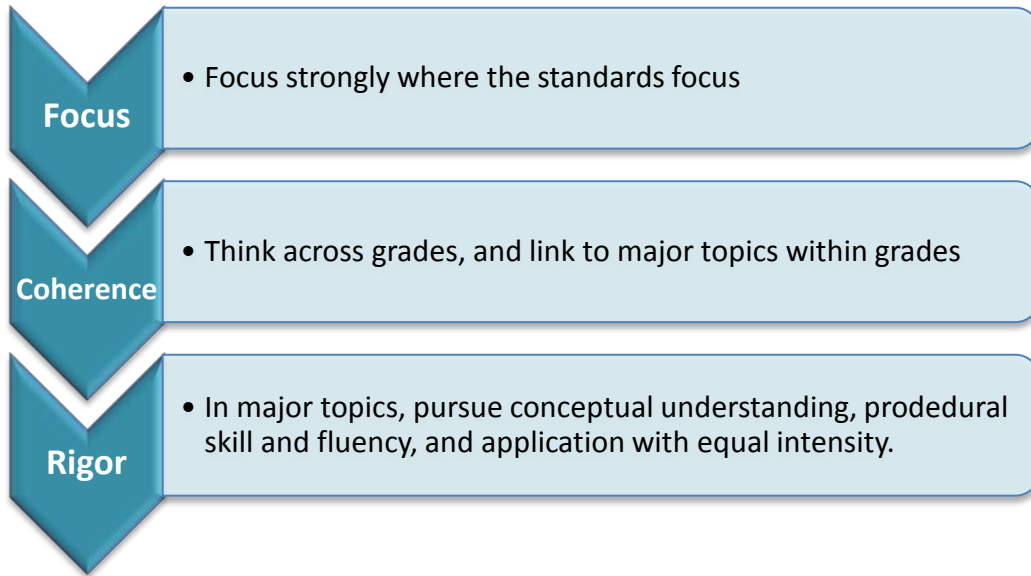

**Tier 1 ratings** receive a “Yes” in Column 1 for Criteria 1-7.

<sup>14</sup> Refer also to page 16 in the High School [Publishers’ Criteria](#) for the Common Core State Standards for Mathematics (Spring 2013).

**Tier 2 ratings** receive a “Yes” in Column 1 for all non-negotiable criteria (Criteria 1 – 4), but at least one “No” in Column 1 for the remaining criteria.  
**Tier 3 ratings** receive a “No” in Column 1 for at least one of the non-negotiable criteria.

FINAL EVALUATION			
Compile the results for Sections I and II to make a final decision for the material under review.			
Section	Criteria	Y/N	Final Justification/Comments
<b>I: Non-Negotiables</b>	1. Focus on Major Work	<b>Yes</b>	Course materials contain applicable content for the subject matter.
	2. Consistent, Coherent Content	<b>No</b>	Review material and prior knowledge is not addressed within the text
	3. Rigor and Balance	<b>Yes</b>	Coursework provides an adequate balance of rigor as determined by each standard.
	4. Practice-Content Connections	<b>No</b>	Mathematical practices are not listed and identified in each lesson. However, some mathematical practices are used throughout the text.
<b>II: Additional Alignment Criteria and Indicators of Quality</b>	5. Alignment Criteria for Standards for Mathematical Content		Not evaluated. Non-negotiable criteria were not met.
	6. Alignment Criteria for Standards for Mathematical Practice		Not evaluated. Non-negotiable criteria were not met.
	7. Indicators of Quality		Not evaluated. Non-negotiable criteria were not met.
<b>FINAL DECISION FOR THIS MATERIAL: Tier III, Not representing quality</b>			

Strong mathematics instruction contains the following elements:

Title: Algebra II

Grade: 11

Publisher: Carnegie Learning, Inc.

Copyright: 2012

Overall Rating: Tier III, Not representing quality

Tier I, Tier II, Tier II Elements of this review:

STRONG	WEAK
<a href="#">Focus on Major Work</a> (Non-Negotiable)	<a href="#">Consistent, Coherent Content</a> (Non-Negotiable)
<a href="#">Rigor and Balance</a> (Non-Negotiable)	<a href="#">Practice-Content Connections</a> (Non-Negotiable)

To evaluate each set of submitted materials for alignment with the standards, begin by reviewing the indicators listed in Column 2 for the non-negotiable criteria in Section I. If there is a “Yes” for all indicators in Column 2 for Section I, then the materials receive a “Yes” in Column 1. If there is a “No” for any indicator in Column 2 for Section I, then the materials receive a “No” in Column 1.

For Section II, begin by reviewing the required indicators in Column 2 for each criterion. If there is a “Yes” for all required indicators in Column 2, then the materials receive a “Yes” in Column 1. If there is a “No” for any required indicators in Column 2, then the materials receive a “No” in Column 1.

**Tier 1 ratings** receive a “Yes” in Column 1 for Criteria 1-7.

**Tier 2 ratings** receive a “Yes” in Column 1 for all non-negotiable criteria (Criteria 1 – 4), but at least one “No” in Column 1 for the remaining criteria.

**Tier 3 ratings** receive a “No” in Column 1 for at least one of the non-negotiable criteria.

CRITERIA	INDICATORS OF SUPERIOR QUALITY	MEETS METRICS (Y/N)	JUSTIFICATION/ COMMENTS
<b>SECTION I: NON-NEGOTIABLE CRITERIA: Submissions must meet all of the non-negotiable criteria to move to tier 2.</b>			
<p><b>Non-Negotiable 1. FOCUS IN HIGH SCHOOL:</b>            In any single course, students and teachers using the materials as designed spend the majority of their time developing knowledge and skills that are widely applicable as prerequisites for postsecondary education.<sup>1, 2</sup>            For courses that do not include Geometry standards, metrics 1a and 1b must be met. For courses including Geometry standards, all three of the metrics must be met.</p> <p><input checked="" type="checkbox"/> Yes    <input type="checkbox"/> No</p>	<p><b>REQUIRED</b>  <b>1a)</b> In any single course, students spend at least 50% of their time on <a href="#">Widely Applicable Prerequisites</a> for postsecondary education.<sup>3</sup></p>	Yes	Student work corresponds to standards written for high school math. Students spend the majority of their time completing work widely applicable as prerequisites for postsecondary education. In the student book and teacher’s resources, at the front of each chapter, the standards are listed for that chapter and each lesson.
	<p><b>REQUIRED</b>  <b>1b)</b> There are problems at a level of sophistication appropriate to high school (beyond mere review of middle school topics) that involve the application of knowledge and skills from grades 6-8 including<sup>4</sup>:</p> <ul style="list-style-type: none"> <li>• Applying ratios and proportional relationships.</li> <li>• Applying percentages and unit conversions, e.g., in the context of complicated measurement problems involving quantities with derived or compound units (such as mg/mL, kg/m<sup>3</sup>, acre-feet, etc.).</li> <li>• Applying basic function concepts, e.g., by interpreting the features of a graph in the context of an applied problem.</li> <li>• Applying concepts and skills of geometric measurement e.g., when analyzing a diagram or schematic.</li> <li>• Applying concepts and skills of basic statistics and probability (see 6–8.SP).</li> <li>• Performing rational number arithmetic fluently.</li> </ul>	Yes	Skills used surpass the prerequisites required for 9 <sup>th</sup> grade. For example, in 8 <sup>th</sup> grade students are expected to create and solve linear equations. In chapter 3 of Carnegie Learning Algebra II students are expected to solve polynomial equations using factor skills learned in Algebra I.
	<p><b>REQUIRED (as applicable)</b>  <b>1c)</b> For courses that include standards from the Geometry conceptual category, student work in Geometry significantly involves applications/modeling as well as geometry applications that use algebra skills.<sup>5</sup></p>	N/A	Not Applicable – Only standards related to Algebra are in Algebra 1, Geometry standards are designated with a G, and none are assigned to Algebra 1

<sup>1</sup> Refer also to criterion #1 in the High School [Publishers’ Criteria](#) for the Common Core State Standards for Mathematics (Spring 2013).

<sup>2</sup> If materials show time in both block and standard 'days,' choose either but remain consistent.

<sup>3</sup> For more information on the Widely Applicable Prerequisites, see Table 1 on Page 8 of the High School [Publishers’ Criteria](#) for the Common Core State Standards for Mathematics (Spring 2013).

<sup>4</sup> Information excerpted from Table 1 on Page 8 of the High School [Publishers’ Criteria](#) for the Common Core State Standards for Mathematics (Spring 2013).

<sup>5</sup> Since the Geometry category itself contains relatively fewer Widely Applicable Prerequisites, this criterion is important to help foster students’ college and career readiness.

CRITERIA	INDICATORS OF SUPERIOR QUALITY	MEETS METRICS (Y/N)	JUSTIFICATION/ COMMENTS
<b>SECTION I (continued): NON-NEGOTIABLE CRITERIA</b>			
<b>Non-Negotiable 2. CONSISTENT, COHERENT CONTENT</b> Each course’s instructional materials are coherent and consistent with the content in the standards. <sup>6</sup>  <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	<b>REQUIRED</b> <b>2a) Giving all students extensive work with course-level problems:</b> Review of material from previous grades and courses is clearly identified as such to the teacher, and teachers and students can see what their specific responsibility is for the current year.	<b>Yes</b>	Students are provided an ample number of grade-level problems although material from previous grades and courses is not identified as such to the teacher.
	<b>REQUIRED</b> <b>2b) Relating course-level concepts explicitly to prior knowledge from earlier grades and courses:</b> The materials are designed so that prior knowledge becomes reorganized and extended to accommodate the new knowledge.	<b>No</b>	Materials do not explicitly indicate prior knowledge learned in previous grades and courses and how it applies to the current coursework
<b>Non-Negotiable 3. RIGOR AND BALANCE:</b> Each grade’s instructional materials reflect the balances in the Standards and help students meet the Standards’ rigorous expectations, by helping students develop conceptual understanding, procedural skill and fluency, and application. <sup>7</sup>  <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	<b>REQUIRED</b> <b>3a) Attention to Conceptual Understanding:</b> Materials develop conceptual understanding of key mathematical concepts, especially where called for in specific content standards or cluster headings by amply featuring high-quality conceptual problems and questions.	<b>Yes</b>	Students are asked to explain understanding and reasoning throughout the coursework. Students learn material through exploratory and conceptual learning through application problems.
	<b>REQUIRED</b> <b>3b) Attention to Procedural Skill and Fluency:</b> Materials give attention throughout the year to individual standards that set an expectation of procedural skill and fluency. In higher grades, sufficient practice with algebraic operations is provided in order for students to meet all of the expectations set in the Standards as a whole.	<b>Yes</b>	Two separate practice sets are given for each lesson to develop procedural skill and fluency to mastery of the content.
	<b>REQUIRED</b> <b>3c) Attention to Applications:</b> Materials are designed so that teachers and students spend sufficient time working with engaging applications/modeling. While modeling is a mathematical practice at every grade, it is more prominent and enhanced in high school with more elements of the modeling cycle present.	<b>Yes</b>	Materials attend thoroughly to those places in the content standards where expectations for multi-step and real-world problems are explicit. Lessons contain examples of application problems associated with the content of the lesson to be modeled during instruction.
	<b>REQUIRED</b> <b>3d) Balance:</b> The three aspects of rigor are not always treated together, and are not always treated separately	<b>Yes</b>	Lessons align to the three components of rigor: Conceptual understanding, procedural skills and fluency, and application as needed in each lesson based on the standard’s need for each particular aspect of rigor. The student book contains mostly application and conceptual understanding, however, two additional practice sets are included for each lesson that cover procedural skills and fluency.

<sup>6</sup> Refer also to criterion #3 in the High School [Publishers’ Criteria](#) for the Common Core State Standards for Mathematics (Spring 2013).

<sup>7</sup> Refer also to criterion #2 in the High School [Publishers’ Criteria](#) for the Common Core State Standards for Mathematics (Spring 2013).

CRITERIA	INDICATORS OF SUPERIOR QUALITY	MEETS METRICS (Y/N)	JUSTIFICATION/ COMMENTS
<b>SECTION I (continued): NON-NEGOTIABLE CRITERIA</b>			
<p><b>Non-Negotiable 4. PRACTICE-CONTENT CONNECTIONS:</b> Materials meaningfully connect the Standards for Mathematical Content and the Standards for Mathematical Practice.<sup>8</sup></p> <p><input type="checkbox"/> Yes    <input checked="" type="checkbox"/> No</p>	<p><b>REQUIRED</b> <b>4a)</b> The materials connect the Standards for Mathematical Practice and the Standards for Mathematical Content.</p>	<p><b>No</b></p>	<p>Mathematical practices are not listed in each lesson and problems are not identified that exemplify mathematical practices. Some problems use concepts from mathematical practices such as justifying and critiquing the reasoning of others, but not all mathematical practices are used.</p>
	<p><b>REQUIRED</b> <b>4b)</b> The developer provides a description or analysis, aimed at evaluators, which shows how materials meaningfully connect the Standards for Mathematical Practice to the Standards for Mathematical Content within each applicable course.</p>	<p><b>No</b></p>	<p>Mathematical Practices are discussed in the Teacher’s Implementation Guide. This discussion, however, focuses more on features of the textbook that connect to the math practices instead of explaining the connections between the Standards for Mathematical Content and Standards for Mathematical Practice in Algebra II.</p> <p>The material does not provide a justification when Mathematical Practices are used and how it relates the lesson content.</p>

<sup>8</sup> Refer also to criterion #5 in the High School [Publishers’ Criteria](#) for the Common Core State Standards for Mathematics (Spring 2013).

CRITERIA	INDICATORS OF SUPERIOR QUALITY	MEETS METRICS (Y/N)	JUSTIFICATION/ COMMENTS
<b>SECTION II: ADDITIONAL ALIGNMENT CRITERIA AND INDICATORS OF QUALITY</b>			
<p><b>Additional Criterion 5. ALIGNMENT CRITERIA FOR STANDARDS FOR MATHEMATICAL CONTENT:</b> Materials foster focus and coherence by linking topics within grades (across domains and clusters). Courses are designed based on the content in the standards.</p> <p><input type="checkbox"/> Yes    <input type="checkbox"/> No</p>	<p><b>REQUIRED</b> <b>5a)</b> Materials base courses on the content specified in the standards (Algebra I, Geometry, and Algebra II).<sup>9</sup></p>		Not evaluated. Non-negotiable criteria were not met.
	<p><b>REQUIRED</b> <b>5b)</b> Materials include problems and activities that serve to connect two or more clusters in a domain, or two or more domains in a category, or two or more categories, in cases where these connections are natural and important.<sup>10, 11</sup></p>		Not evaluated. Non-negotiable criteria were not met.
	<p><b>5c)</b> Materials include learning objectives that are visibly shaped by CCSSM cluster and domain headings.<sup>10</sup></p>		Not evaluated. Non-negotiable criteria were not met.
	<p><b>5d)</b> Materials preserve the focus, coherence, and rigor of the Standards even when targeting specific objectives.<sup>10</sup></p>		Not evaluated. Non-negotiable criteria were not met.
<p><b>Additional Criterion 6. ALIGNMENT CRITERIA FOR STANDARDS FOR MATHEMATICAL PRACTICE:</b> Aligned materials make meaningful and purposeful connections that enhance the focus and coherence of the standards rather than detract from the focus and include additional content/skills to teach which are not included in the standards.</p> <p><input type="checkbox"/> Yes    <input type="checkbox"/> No</p>	<p><b>REQUIRED</b> <b>6a)</b> Careful Attention to Each Practice Standard: Materials attend to the full meaning of each practice standard.<sup>12</sup></p>		Not evaluated. Non-negotiable criteria were not met.
	<p><b>REQUIRED</b> <b>6b)</b> Materials provide sufficient opportunities for students to construct viable arguments and critique the arguments of other concerning key course-level mathematics that is detailed in the content standards (cf. MP.3).<sup>13</sup></p>		Not evaluated. Non-negotiable criteria were not met.
	<p><b>REQUIRED</b> <b>6c)</b> Materials engage students in problem solving as a form of argument, attending thoroughly to places in the standards that explicitly set expectations for multi-step problems.<sup>13</sup></p>		Not evaluated. Non-negotiable criteria were not met.
	<p><b>6d)</b> Materials explicitly attend to the specialized language of mathematics.<sup>13</sup></p>		Not evaluated. Non-negotiable criteria were not met.

CRITERIA	INDICATORS OF SUPERIOR QUALITY	MEETS METRICS (Y/N)	JUSTIFICATION/ COMMENTS
<b>SECTION II (continued): ADDITIONAL ALIGNMENT CRITERIA AND INDICATORS OF QUALITY</b>			
<p><b>Additional Criterion 7. INDICATORS OF QUALITY:</b> Quality materials should exhibit the indicators outlined here in order to give teachers and students the tools they need to meet the expectations of the standards.</p> <p><input type="checkbox"/> Yes      <input type="checkbox"/> No</p>	<p><b>REQUIRED</b> <b>7a)</b> Materials support the uses of technology as called for in the standards.</p>		Not evaluated. Non-negotiable criteria were not met.
	<p><b>REQUIRED</b> <b>7b)</b> The underlying design of the materials distinguishes between problems and exercises. In essence the difference is that in solving problems, students learn new mathematics, whereas in working exercises, students apply what they have already learned to build mastery. Each problem or exercise has a purpose.</p>		Not evaluated. Non-negotiable criteria were not met.
	<p><b>REQUIRED</b> <b>7c)</b> Design of assignments is not haphazard: exercises are given in intentional sequences.</p>		Not evaluated. Non-negotiable criteria were not met.
	<p><b>REQUIRED</b> <b>7d)</b> There is variety in what students produce. For example, students are asked to produce answers and solutions, but also, in a grade-appropriate way, arguments and explanations, diagrams, mathematical models, etc.</p>		Not evaluated. Non-negotiable criteria were not met.
	<p><b>REQUIRED</b> <b>7e)</b> There are separate teacher materials that support and reward teacher study including, but not limited to: discussion of the mathematics of the units and the mathematical point of each lesson as it relates to the organizing concepts of the unit, discussion on student ways of thinking and anticipating a variety of students responses, guidance on lesson flow, guidance on questions that prompt students thinking, and discussion of desired mathematical behaviors being elicited among students.</p>		Not evaluated. Non-negotiable criteria were not met.
	<p><b>REQUIRED</b> <b>7f)</b> Support for English Language Learners and other special populations is thoughtful and helps those students meet the same standards as all other students. The language in which problems are posed is carefully considered.</p>		Not evaluated. Non-negotiable criteria were not met.
	<p><b>7g)</b> There is variety in the pacing and grain size of content coverage.<sup>14</sup></p>		Not evaluated. Non-negotiable criteria were not met.
	<p><b>7h)</b> Lessons are thoughtfully structured and support the teacher in leading the class through the learning paths at hand, with active participation by all students in their own learning and in the learning of their classmates.</p>		Not evaluated. Non-negotiable criteria were not met.
	<p><b>7i)</b> Manipulatives are faithful representations of the mathematical objects they represent and are connected to written methods.</p>		Not evaluated. Non-negotiable criteria were not met.

**Tier 1 ratings** receive a “Yes” in Column 1 for Criteria 1-7.

<sup>14</sup> Refer also to page 16 in the High School [Publishers’ Criteria](#) for the Common Core State Standards for Mathematics (Spring 2013).

**Tier 2 ratings** receive a “Yes” in Column 1 for all non-negotiable criteria (Criteria 1 – 4), but at least one “No” in Column 1 for the remaining criteria.  
**Tier 3 ratings** receive a “No” in Column 1 for at least one of the non-negotiable criteria.

FINAL EVALUATION			
Compile the results for Sections I and II to make a final decision for the material under review.			
Section	Criteria	Y/N	Final Justification/Comments
<b>I: Non-Negotiables</b>	1. Focus on Major Work	<b>Yes</b>	Course materials contain applicable content for the subject matter.
	2. Consistent, Coherent Content	<b>No</b>	Review material and prior knowledge is not addressed within the text
	3. Rigor and Balance	<b>Yes</b>	Coursework provides an adequate balance of rigor as determined by each standard.
	4. Practice-Content Connections	<b>No</b>	Mathematical practices are not listed and identified in each lesson. However, some mathematical practices are used throughout the text.
<b>II: Additional Alignment Criteria and Indicators of Quality</b>	5. Alignment Criteria for Standards for Mathematical Content		Not evaluated. Non-negotiable criteria were not met.
	6. Alignment Criteria for Standards for Mathematical Practice		Not evaluated. Non-negotiable criteria were not met.
	7. Indicators of Quality		Not evaluated. Non-negotiable criteria were not met.
<b>FINAL DECISION FOR THIS MATERIAL: Tier III, Not representing quality</b>
