Each set of submitted materials was evaluated for alignment with the standards beginning with a review of the indicators for the non-negotiable criteria. If those criteria were met, a review of the other criteria ensued.

Tier 1 ratings received a “Yes” for all Criteria 1 – 7.

Tier 2 ratings received a “Yes” for all non-negotiable criteria (Criteria 1 – 4), but at least one “No” for the remaining criteria.

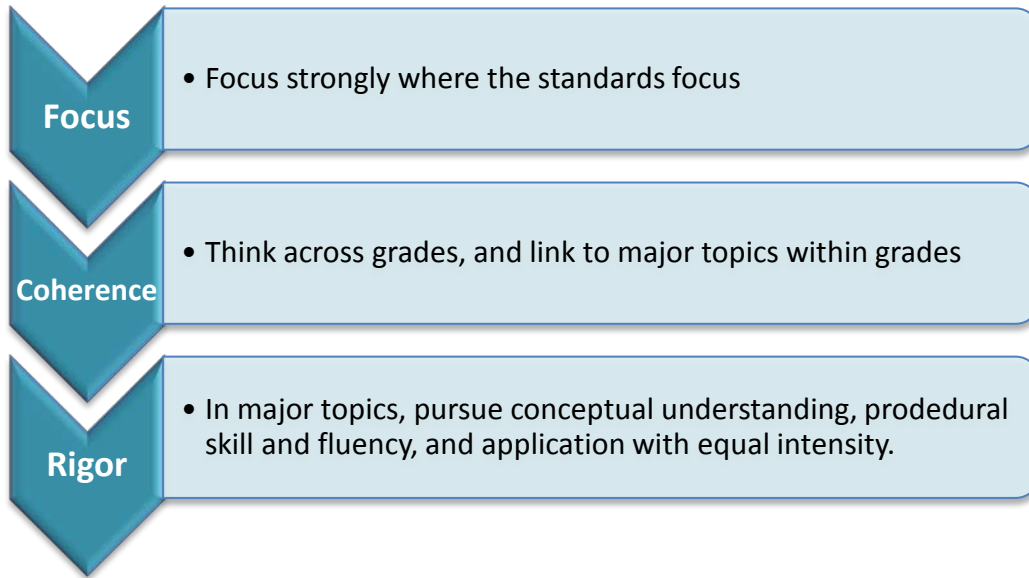

Tier 3 ratings received a “No” for at least one of the non-negotiable criteria.

	Practice-Content Connections (Non-Negotiable)

To evaluate each set of submitted materials for alignment with the standards, begin by reviewing the indicators listed in Column 2 for the non-negotiable criteria in Section I. If there is a “Yes” for all indicators in Column 2 for Section I, then the materials receive a “Yes” in Column 1. If there is a “No” for any indicator in Column 2 for Section I, then the materials receive a “No” in Column 1.

For Section II, begin by reviewing the required indicators in Column 2 for each criterion. If there is a “Yes” for all required indicators in Column 2, then the materials receive a “Yes” in Column 1. If there is a “No” for any required indicators in Column 2, then the materials receive a “No” in Column 1.

Tier 1 ratings receive a “Yes” in Column 1 for Criteria 1-7.

Tier 2 ratings receive a “Yes” in Column 1 for all non-negotiable criteria (Criteria 1 – 4), but at least one “No” in Column 1 for the remaining criteria.

Tier 3 ratings receive a “No” in Column 1 for at least one of the non-negotiable criteria.

CRITERIA	INDICATORS OF SUPERIOR QUALITY	MEETS METRICS (Y/N)	JUSTIFICATION/ COMMENTS
SECTION I: NON-NEGOTIABLE CRITERIA: Submissions must meet all of the non-negotiable criteria to move to tier 2.			
Non-Negotiable 1. FOCUS ON MAJOR WORK¹: Students and teachers using the materials as designed devote the large majority ² of time in each grade K–8 to the major work of the grade. <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	REQUIRED 1a) Materials should devote at least 65% and up to approximately 85% of class time to the major work of each grade with Grades K–2 nearer the upper end of that range, i.e., 85%. Each grade must meet the criterion; do not average across two or more grades.	Yes	Approximately 67% of class time is devoted to major work of the grade.
	REQUIRED 1b) In any one grade, aligned materials should spend minimal time on content outside of the appropriate grade levels. In aligned materials there are no chapter tests, unit tests, or other such assessment components that make students or teachers responsible for any topics before the grade in which they are introduced in the Standards. ³	Yes	Materials focus on content from Grade 6.
Non-Negotiable 2. CONSISTENT, COHERENT CONTENT Each course’s instructional materials are coherent and consistent with the content in the standards. <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	REQUIRED 2a) Materials connect supporting content to major content in meaningful ways so that focus and coherence are enhanced throughout the year. ⁴	No	Supporting content is not connected to major content. This course addresses one standard at a time in the same order that they are presented in the CCSS document. The supporting standards (Geometry) are addressed in Unit 2 in the second half of this course with no direct connection made to the major work of the grade.
	REQUIRED 2b) Materials including problems and activities that serves to connect two or more clusters in a domain, or two or more domains in a grade, in cases where these connections are natural and important. ⁵	No	There are six Unit lessons that connect standards within individual domains, but all of the other lessons address individual standards. There is no connection made between domains at all.

¹ For more on the major work of the grade, see [Focus by Grade Level](#).

SECTION I (continued): NON-NEGOTIABLE CRITERIA			
<p>Non-Negotiable 3. RIGOR AND BALANCE: Each grade’s instructional materials reflect the balances in the standards and help students meet the standards’ rigorous expectations, by helping students develop conceptual understanding, procedural skill and fluency, and application.⁶</p> <p><input type="checkbox"/> Yes <input checked="" type="checkbox"/> No</p>	<p>REQUIRED 3a) Attention to Conceptual Understanding: Materials develop conceptual understanding of key mathematical concepts, especially where called for explicitly in specific content standards or cluster headings by amply featuring high-quality conceptual problems and questions.</p>	Yes	Videos and explanations are provided to help build conceptual understanding when appropriate. It should be noted that in the video for the Introduction to Ratios lesson, the picture does not match the ratio. There should be 10 strawberries, and there are only 9.
	<p>REQUIRED 3b) Attention to Procedural Skill and Fluency: Materials give attention throughout the year to individual standards that set an expectation of procedural skill and fluency. In grades K-6, materials help students make steady progress throughout the year toward fluent computation. In higher grades, sufficient practice with algebraic operations is provided in order for students to have the foundation for later work in algebra.</p>	No	Standards are addressed in individual lessons. As a result, students do not practice standards targeting fluency throughout the year.
	<p>REQUIRED 3c) Attention to Applications: Materials are designed so that teachers and students spend sufficient time working with engaging applications, without losing focus on the major work of each grade including ample practice with single-step and multi-step contextual problems that develop the mathematics of the grade, afford opportunities for practice, and engage students in problem solving.</p>	Yes	Application problems are provided although it would be helpful if more multi-step problems were included within lessons.
	<p>REQUIRED 3d) Balance: The three aspects of rigor are not always treated together, and are not always treated separately.</p>	Yes	There are lessons that address the aspects of rigor together and separately although fluency is lacking in the materials as a whole.
<p>Non-Negotiable 4. PRACTICE-CONTENT CONNECTIONS: Materials meaningfully connect the Standards for Mathematical Content and</p>	<p>REQUIRED 4a) The materials connect the Standards for Mathematical Practice and the Standards for Mathematical Content.</p>	No	Although the Mathematical Practices are listed in the Lesson Activities document linked in the tutorial for each lesson, there is no direct connection made between the Standards for Mathematical Practice and the Standards for Mathematical Content.

SECTION I: NON-NEGOTIABLE CRITERIA: Submissions must meet all of the non-negotiable criteria to move to tier 2.			
Non-Negotiable 1. FOCUS ON MAJOR WORK¹: Students and teachers using the materials as designed devote the large majority ² of time in each grade K–8 to the major work of the grade. <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	REQUIRED 1a) Materials should devote at least 65% and up to approximately 85% of class time to the major work of each grade with Grades K–2 nearer the upper end of that range, i.e., 85%. Each grade must meet the criterion; do not average across two or more grades.	No	The majority of class time is not spent on major work of the grade. No alignment to the Common Core State Standards is provided. Also, the content includes content from prior grades (such as a lesson on Measurement).
	REQUIRED 1b) In any one grade, aligned materials should spend minimal time on content outside of the appropriate grade levels. In aligned materials there are no chapter tests, unit tests, or other such assessment components that make students or teachers responsible for any topics before the grade in which they are introduced in the Standards. ³	No	Materials include content from future courses. For example, in 7B there is a lesson titled “Pythagorean Theorem and Circles.” The Pythagorean Theorem is not in the standards until 8 th grade, but it is assessed in these materials. Transformations, another 8 th grade topic is addressed in the lesson titled “Integers 3.”
Non-Negotiable 2. CONSISTENT, COHERENT CONTENT Each course’s instructional materials are coherent and consistent with the content in the standards. <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	REQUIRED 2a) Materials connect supporting content to major content in meaningful ways so that focus and coherence are enhanced throughout the year. ⁴	No	This course addresses individual mathematical topics, not the CCSS, so there is no connection to be made between supporting and major content.
