If a site receives a notice for two consecutive observation periods, an indicator of high negative climate, low lack of adult negativity or an indicator for both may be reported on the performance profile. Lack of adult negativity is an indicator used in infant CLASS® and is comparable to the PreK and toddler negative climate dimension. Like all indicators for CLASS® it is expressed as “High,” “Medium,” or “Low” rather than as a numerical score.

§511. Performance Rating Calculations for Community Networks

A. – A.3. …

B. The CLASS® observation results shall be determined by averaging the results of all fall and spring dimension-level toddler and PreK observation results for all toddler and PreK classrooms within the community network excluding negative climate, and beginning in the 2020-2021 school year, the CLASS® observation results shall be determined by averaging the results of all fall and spring dimension-level infant, toddler, and PreK observation results for all infant, toddler, and PreK classrooms within the community network excluding negative climate.
