Early childhood observations using the Classroom Assessment Scoring System (CLASS®) are designed to provide compelling evidence related to the nature of interactions between children and teachers. CLASS® looks at interactions that research has proven promotes children's social/emotional and cognitive development. Observers should conduct observations with sensitivity and professionalism, and everyone involved should be clear about their role in the observation.

**Purpose of Observation**

CLASS® assesses the extent to which teachers effectively support children’s social and cognitive development. Each CLASS® tool contains one or more domains, which include several dimensions. Each dimension is defined by observable indicators and behavior markers. For example, within the domain of Emotional Support, the Positive Climate dimension includes the indicators of relationships, positive affect, positive communication, and respect. Each of those indicators contain observable behavior markers, such as physical proximity, smiling, enthusiasm, eye contact, etc.

**Pre-K CLASS®:** The Prekindergarten (Pre-K) CLASS® tool is organized to assess three broad domains of interactions among teachers and children. The Pre-K CLASS® tool is designed for classrooms with children 3-5 years old.

- **Domain 1: Emotional Support**
  - Positive Climate, Negative Climate, Teacher Sensitivity, Regard for Student Perspectives

- **Domain 2: Classroom Organization**
  - Behavior Management, Productivity, Instructional Learning Formats

- **Domain 3: Instructional Support**
  - Concept Development, Quality of Feedback, Language Modeling

**Toddler CLASS®:** The Toddler CLASS® tool is organized to assess two broad domains of interactions among teachers and children. The Toddler CLASS® tool is designed for classrooms with children 15-36 months old.

- **Domain 1: Emotional and Behavioral Support**
  - Positive Climate, Negative Climate, Teacher Sensitivity, Regard for Child Perspectives, Behavior Guidance

- **Domain 2: Engaged Support for Learning**
  - Facilitation of Learning and Development, Quality of Feedback, Language Modeling

**Infant CLASS®:** The Infant CLASS® tool is organized to assess one broad domain of interactions among teachers and infants. The Infant CLASS® tool is designed for classrooms with children birth to 18 months old.

- **Domain 1: Responsive Caregiving Domain**
  - Relational Climate, Teacher Sensitivity, Facilitated Exploration, and Early Language Support.
Observation Scheduling and Classroom Selection

1. Louisiana Department of Education (LDOE) provides a list of early childhood sites participating in the Louisiana Early Childhood Care and Education Network. The Picard Center’s data team randomly selects 50% of the total number of classrooms; ensuring at least one infant, toddler, and pre-K classroom is selected at each site (when applicable).

2. Monthly, the Picard Center staff schedules observations for each third-party observer in their assigned regions.

3. The Picard Center contacts each site by phone or email prior to the month they will be observed in order to verify site information:
   - Number of classrooms and age types
   - Optimal learning time
   - Mailing and physical address

4. Physical letters are mailed to the sites with electronic letters emailed to Lead Agency contacts, notifying them of the month window in which the observation(s) will occur.
   - The letter states, “If you have scheduled events during this time that preclude our observations (e.g., scheduled field trips, picture day, health screenings, holidays, teacher absences, professional development days), please contact the Picard Center by email classactull@gmail.com no later than 1 week before the scheduled timeframe of the observation.”

5. Each observer’s schedule is reviewed for schedule conflicts and adjustments are made based on classroom or site-level information provided by the sites. Picard Center staff provide each observer with a revised monthly calendar of sites to observe on designated days with contact information.

Observer Protocol Steps

1. Each observation will take place at an assigned date and time. Prior to the observation, the site/school being assessed will be provided written notice by the Picard Center as noted above.

2. Prior to the scheduled observation:
   - Observers review their schedule for potential conflicts and notify the Picard Center prior to the scheduled observation to change their assigned teacher and/or site location.
   - Before entering the site/school, the observer should know the age type (infant vs. toddler vs. pre-K) they are assigned to observe and the teacher’s name. Refer to the schedule provided to each observer.

3. Upon arrival at the site/school:
   - The observer must report to the administration office and:
     o Introduce himself/herself to office staff and administrator (if available),
     o Present identification and sign-in on appropriate site documentation,
     o Present a Child Care Criminal Background Check (CCCBC) for licensed centers only,
     o Verify classroom information with administrator/director or designee (i.e., classroom locations by age and correct spelling of the teacher’s name),
     o Receive an updated daily schedule for the classroom being observed and
     o Request access to a quiet space for four, 10-minute scoring cycles (pre-K only).
   - If a double coder is present for the observation, he/she must follow the same procedures above. The lead observer will select the classroom according to his/her schedule and the double coder will accompany the observer to that classroom.
4. Classroom selection:
   - A classroom must have the regularly assigned lead teacher present during the observation. The lead teacher must have been working in that role for at least 10 work days. **Exceptions: Lead substitute teachers are eligible for a CLASS® observation if they have been in the classroom for at least 10 consecutive work days.**
   - Picard Center staff will provide teacher names for each observation along with a monthly calendar.
   - If the teacher provided is no longer employed by the site or the teacher is in a classroom with a different age type, the observer should contact the Picard Center for assistance.
   - If observers are unsure whether a classroom has been observed by another third-party observer, they should contact the Picard Center before they begin observing.

5. Upon entering the classroom, the observer will introduce herself and request a daily schedule (if they have not received one from the office). Based on the daily schedule, the observer will plan for the approximate two-hour observation/scoring. The teacher should notify the observer of any schedule deviations, which may affect the observation. The observer may be accompanied by a second observer to shadow score simultaneously. The primary purpose of this shadow score is to ensure inter-rater reliability, which has no reflection of the quality of the site being observed or alters the score.

6. Observers will not interact with teachers beyond requesting a daily schedule, and will do their best to refrain from and minimize any communications, distractions, or intrusions into the classroom.

7. The observation will consist of **four 20-minute observation cycles** each followed by **10-minute scoring cycles** (average 120 minutes total time) for pre-K and toddler observations and **four 15-minute observations cycles** followed by **10-minute scoring cycles** (average 100 minutes total time) for infant observations. In pre-K classes, when possible the observer will leave the classroom to complete each 10 minute scoring cycle; however, in order to minimize distraction in infant and toddler classrooms, Teachstone© recommends observers remain in the classroom when scoring. In the event that observers remain in the classroom, they will turn their back on the class and quietly complete the scoring. If children approach an observer, he/she will kindly redirect the child into classroom activities.
   
   * When a quiet space is not available at the site, observers may sit outdoors to complete scoring. This is not an opportunity to collect additional data for pre-K observations.

8. Based upon site reported optimal learning times, the CLASS® observation typically starts at the beginning of the school day and continues throughout the morning for approximately 2 hours. The total time the observer is present at the site is dependent upon the daily schedule and extracurricular activities. The following activities, pull-outs, and specials will not be observed:
   - Physical Education, Music, Computer, Library, Art,
   - Cafeteria-based meals,
   - Toileting in pre-K classrooms where the whole group visits the restroom,
   - Outdoor recess is not included in pre-K observations but is included in infant and toddler observations. However, if pre-K teachers are leading instructional or interactional activities outside, these interactions can be observed.

   **Note:** Observations can occur during transitions to or from the activities, ‘pull-outs or specials’ listed above.
9. Observers will not:
   - Ask teachers to change schedules, move rooms, rearrange children or groups
   - Engage in back and forth conversations with children or teachers
   - Conduct observations during the 10-minute break time between cycles
   - Conduct more than four cycles of observations
   - Use their phone during the observation (time must be kept via a clock, watch, or stopwatch)
   - Share feedback immediately following an observation

   At the conclusion of the observation, the observer will confirm with the teacher that the
   observation is complete. There will not be an exit interview after the observation, however,
   general feedback of the highest and lowest scoring dimensions for infant CLASS®
   observations and the two highest and lowest dimension scores for pre-K and toddler
   CLASS® observations will be provided via the LDOE Early Childhood portal.

10. Solutions to expected problems on the day of the observation:
   - Teacher not available/Classroom not available/Unable to complete the observation
     o If it is practical (close enough/time available) and the classroom is likely to become
       available for observation, the observer should wait until the observation can begin.
     o If the site/school has multiple classrooms with children of the same age as the
       originally assigned classroom, the observer should contact the Picard Center for
       reassignment.
   - New teacher
     o New lead teacher (employed or with group of children less than 10 school days) –
       see method above.
   - Fifty percent of enrolled children are not present on day of the observation
     o Fifty percent of children must be present. See method above.
   - The observer MUST NOT exchange infant for toddler rooms, toddler rooms for pre-K
     classrooms (or the reverse).
   - Children approach observer(s)
     o Observers will not ignore children’s bids for attention or greeting; they will simply
       state their purpose of being in the classroom (to do their work) and kindly re-direct
       the children to their activities.
   - The site/school may have mixed classes with infants and toddlers or toddlers and
     preschoolers
     o Contact the Picard Center to determine which age type the classroom is classified
       as in the LDOE Early Childhood portal.
     o For mixed infant and toddler classrooms, the infant CLASS® tool will be used if the
       majority of the children are 15 months or younger and the toddler CLASS® tool will
       be used if the majority of the children are 15 months up to 36 months of age.
     o For mixed toddler and pre-K classrooms, the toddler CLASS® tool will be used if the
       majority of the children are 15 months up to 36 months of age and the pre-K
       CLASS® tool will be used if the majority of the children are 3-5 years of age.

   Note: A September 30 cut-off date determines the initial classroom configuration each
   academic year.
11. If an observer enters a classroom and determines that he/she is related to or associated with someone in the room, he/she must IMMEDIATELY notify the Picard Center and remove him/herself from the room. Additionally, if there is any question as to whether a perceived or potential conflict of interest exists the observer will contact the Picard Center and allow them to make the final determination.

12. In the unusual circumstance of any suspected abuse or neglect observed at the time of the observation the observer must report the observed behaviors to the Office of Community Services as mandated by law.

**Additional Protocol Information**

1. All observers must have proficient computer skills (i.e. typing, computer access, scanning documents, etc.) to be able to complete electronic forms.

2. Observers are **not allowed** to perform more than one observation per day, and cannot directly contact sites/schools to reschedule an observation.

3. Observers should be professional in demeanor and attire at all times and never let personal preferences influence scoring.

4. Notes must be detailed and must provide concrete examples of observations from the classroom. Summary statements for each dimension should address each indicator noting the presence/absence of particular behaviors. Picard staff will conduct random data checks on 5% of the total number of observations completed. Feedback will be provided on the quality, completeness, and accuracy of observation data and corresponding evidence. If the information is not well-supported and is questioned by the LDOE then the observer may be required to provide additional information or rewriting. If there are significant delays between cycles, observers should note the reasons. If there are any interactions that go beyond the ones stipulated here, the observer should document those interactions at the time of the observation.

5. Observers should contact the Picard Center via email (**classactull@gmail.com**) by 4:30 pm the **SAME** day the observation is completed with the site name, classroom code, teacher name, and age group. **Exception:** If you conduct an observation on a Friday, please email us by 12:00 pm that same day.

6. For all shadow scoring observations both the lead observer and the shadow observer must enter their observation data into the Picard Center’s designated system by **3 pm the **SAME** day of conducting the observation. For audited observations, the lead observer must send the observation feedback via email to the shadow observer within **3 days** of the reliability observation (copy the Picard Center). The shadow observer must review the feedback and provide comments on the accuracy, quality, and completeness of their work using the Picard-approved form within **7 days** of the observation.

**NOTE:** If an observer does not achieve 80% inter-rater reliability, the observer will cease observing classrooms and will work with Picard staff to increase reliability to 80% or higher by coding additional observation videos and participate in a second shadow observation before conducting observations alone. If an observer is deemed unreliable over two consecutive shadow scoring observations, they will be relieved of their duties. Picard will track observers’ scoring trends to ensure observer drift is not occurring throughout the observation year.
7. New Picard observers will participate in at least one practice observation (per age type) with a veteran observer prior to conducting observations alone. The observers will follow the same procedures for shadow scoring observations (see number 6).

8. The CLASS® scoring form must be entered into the LDOE’s designated data system with the accompanying feedback (one highest and one lowest for infant observations and two highest and two lowest scores for each dimension for pre-K and toddler observations) within 2 days of the completed observation.

9. The observation scoring booklet and related notes must be postmarked within 3 days of the completed observation. Observation materials may be turned in earlier, but any materials turned in later will result in corrective action. All materials should be mailed to the following address:

    Picard Center, Attn: Kara Farmer-Primeaux, 200 East Devalcourt, Lafayette, LA 70506.

10. Picard Center staff will answer all questions from observers within 48 hours of submission. Direct questions should be emailed to classactull@gmail.com.

11. Questions to observers from Picard Center staff related to CLASS® scoring MUST be answered in a timely manner within 2 days of receiving the inquiry.

12. At no time should an observer discuss classroom observations or CLASS® scores with another observer. All information is confidential and should only be discussed with Picard Center staff.

13. Yearly CLASS® recertification is the duty of the observer. Proof of current certification must be provided to Picard Center staff, and updated as needed. A CCCBC is also the duty of the observer. A copy of the background check must be received by the Picard Center (via e-mail) prior to the observer’s first scheduled observation. The observer should have a copy of the CCCBC with them for each observation and present it to the director (licensed centers only).
