

Self-Assessment Report for Amari Jones

Thursday, June 9, 2016

Written Responses

Amari Jones

Q1) How are the results of this Self-Assessment different than your previous Self-Assessment? Please provide at least two examples where the numeric values in an area have changed.

My ranking on Self-Determination and Motivation is a bit lower. That's because I learned that work expectations are greater than school expectations. I will have to work harder when I get a job.

My Communications Skills ranking is lower. That's because I realize how hard it will be to work with adults I don't know.

Q2) After this second Self-Assessment, what are the areas that you now believe you'll need encouragement and support after high school to become a successful adult? Please provide at least two examples.

I will need encouragement and support working with adults I don't know.

I think I'll need support to remain determined, because work will be harder than school.

Q3) How are work expectations different from school expectations? Please provide at least two examples.

At work they expect you to be on time every day. At school you can be late and not get in too much trouble. At work they will fire you if you are late too many days.

At work you can't fool around too much. We have more fun at school. You have to be more serious at work.

Q4) Thinking back on these two Self-Assessments, please describe your future career plans. Please provide at least two reasons why you believe these are the right career plans for you.

I hope to be a stylist. This is the right career plan for me because I want to help people look their best. The second reason is because I am artistic and know how to make people look good.
