

The background of the slide is a photograph of an industrial facility, possibly a refinery or power plant, featuring complex scaffolding, pipes, and large cylindrical tanks. The scene is lit with a warm, golden light, suggesting either sunrise or sunset. Two stylized white lightning bolt graphics are positioned on the left and right sides of the top half of the image. A semi-transparent white banner with rounded corners is centered across the middle of the image, containing the main title and names.

Tara High School's PTECH Program "CY-TECH Magnet Academy"

Latasha Levatino, Asst Principal
Sarah Walsh, IBM Liaison

PTECH Origins

[P-TECH](#): Check out the video from the founding PTECH school in Brooklyn, NY.

The PTECH Program began in Brooklyn, New York in 2011. The 9-14 grade model means that two years of Associates Degree study (in Computer Science) is embedded in the high school experience. Students meet with industry mentors and train for "new collar" jobs fit for the 21st Century workforce. The above link leads to the PTECH website where details regarding how the model works and what students can expect to experience in the program can be found.

Louisiana Believes

Our Approach

- The Planting Committee Traveled to Brooklyn, NY in February 2018. Upon return, the committee met over the course of three months to plan out course sequences and finalize an MOU.
- We began recruitment for students in May 2018 and hosted our Pre-Summer Bridge Program in June 2018.

Louisiana PTECH Teams and Principal Rashid Davis
of PTECH Brooklyn

More on Approach

- The PTECH program was approved by and introduced by the Governor on May 2, 2018.
- Tara High School went on to personalize the program and accept the Founding Members of the CY-TECH Academy in the Summer of 2018.

Photos from the May 2, 2018 Governor's Press Conference

Louisiana Believes

Origin of CY-TECH

CY-TECH is the result of a **combination** of the PTECH model and Tara's Cyber Engineering Program, enhanced by IBM and BRCC's partnership.

CYBER + PTECH =

CY-TECH Academy

The Founding Members of CY-TECH cohort one visit BRCC, our post-secondary partner, in June 2018.

Why CY-TECH?

- Students who graduate from Tara High School's CY-TECH Program will earn both a high school diploma and an Associates Degree in a Computer Science. CY-TECH is part of the East Baton Rouge Parish School System and is open to all EBR students, at no cost to students and their families. Additionally, admission criteria for students include: that the student be on-grade level, complete an interest survey, participate in a parent/guardian interview, agree to be mentored by a pre-selected advisor, and commit to the summer bridge programs and college coursework.

What is CY-TECH Magnet Academy

The Cy-TECH Magnet Academy is a school-based program designed after Pathways in Technology Early College High School (P-TECH) model, which combines high school, college and the professional world. This school-within-a-school encompasses grades 9 to 14. With the promise that students in this six-year time frame, students earn not only a high school diploma, but also an Associate in Computer Science degree in Software Development from Baton Rouge Community College. Graduates will have the skills and experience to step into well-paying jobs in Information Technology (IT) and earn an opportunity to interview with IBM.

Louisiana Believes

Our Post-Secondary Partner

- Baton Rouge Community College offers an Associate of Science degree in Computer Science that will provide students with the core computer science knowledge and skills that will prepare them to enter the workforce or transfer to a four-year academic institution.

Our Industry Partner

- At IBM, work is more than a job - it's a calling: To build. To design. To code. To consult. To think along with clients and sell. To make markets. To invent. To collaborate. Not just to do something better, but to attempt things you've never thought possible. To lead in this new era of technology and solve some of the world's most challenging problems.
- Assigned an IBM Liaison to the site and a mentor to each student.

Hello Cy-Tech Mentors!

Thank you all for such a great start to the school year! Our first cohort of students have officially completed their first semester of high school. We are so excited to share the remainder 2018-2019 school year with all of you!! Below, you'll see some key dates for Fall Mentor Activities.

Mentor Extravaganza #1

On Friday, October 28th, IBM hosted its first ever Cy-Tech mentor event

Thursday, June 21 st	James in E21: Workplace Skills	Break	Holmes in E23: English Acceleration
Monday, June 25 th	Holmes in E23: English Acceleration	Break	James in E21: Math Acceleration
Tuesday, June 26 th	James in E21: Math Acceleration	Break	Holmes in E23: English Acceleration
Wednesday, June 27 th	Holmes in E23: English Acceleration	Break	James in E21: Math Acceleration
Thursday, June 28 th	James in E21: Math Acceleration	Break	Holmes in E23: Workplace Skills

Math

- Operations with integers and rational numbers
- Operations with algebraic expressions
- Solution of equations, inequalities, and word problems
- Algebraic operations
- Solutions of equations and inequalities
- Coordinate geometry
- Applications and other algebra topics
- Functions and trigonometry

• Identify main ideas

- Make inferences
- Distinguish claims and supporting evidence
- Logic of a simple sentence and other relationships between sentences

Workplace Curriculum

- Collaboration, Communication, Analytical Thinking, Self-Management, Leadership, Motivation, and Responsibility
