WHAT IS THE LOUISIANA INNOVATIVE ASSESSMENT PROGRAM?

Research shows that students need to possess deep knowledge of a subject in order to effectively read, comprehend and write about complex texts. However, reading tests traditionally use passages that are not from the texts students study each day requiring them to grapple with vocabulary and content that may be entirely new, placing those who have fewer life experiences at a disadvantage.

To solve for this disconnect and better assess students’ knowledge of complex texts, Louisiana has partnered with school systems to develop an innovative English language arts (ELA) assessment for grades 3-8 that ensures all students have an equal opportunity to succeed on the test.

PILOT HIGHLIGHTS

- **Integration:** Several brief assessments are administered throughout the year, rather than one end-of-year ELA exam, to measure students’ deep knowledge of books or passages that they have studied in class.

- **Focus:** Teachers can focus instruction on background knowledge and making meaning of full texts.

- **Accessibility:** All students have the opportunity to develop shared background knowledge based on classroom instruction.

- **Flexibility:** School systems continue to decide which curriculum is used for instruction and which assessments students take.

WHAT SUCCESS HAS THE PILOT HAD IN LOUISIANA AND NATIONALLY?

- During the 2022-2023 school year, 24 school systems, and approximately 24,600 students will participate in the new assessments.

- “This is a more authentic and effective way to assess students’ knowledge of texts and topics. When students can take information from texts apart and put it back together in a way that deeply expresses their understanding of the world around them, we know that real learning is happening.” - Emily Howell, Teacher, Lincoln Parish
