

WHAT IS LEAP 360?

LEAP 360 is an optional assessment system aligned to the Louisiana Student Standards and LEAP 2025 assessments that provides educators with additional information about student learning throughout the school year to help teachers, schools, and school systems monitor student learning and address student needs.

- **Diagnostic assessments:** help provide a general sense of student readiness for grade-level content in English language arts (ELA) and mathematics and the level of support students might need as they proceed through the curriculum
- **Interim assessments:** provide opportunities to incorporate additional monitoring of student progress of key knowledge and skills in ELA and mathematics into the rhythm of classroom instruction
- **EAGLE:** allows teachers to integrate high-quality mathematics, science, and social studies questions into day-to-day classroom experiences and curricula

WHAT IMPACT HAS LEAP 360 HAD IN LOUISIANA?

Each year, the results from LEAP 2025 summative assessments provide Louisiana educators, students, and parents with important information about what students did and did not learn during the year. However, the results have limited instructional implications. LEAP 360, when integrated into instruction, can be a more useful tool to help monitor student progress and address student needs.

The positive impacts of LEAP 360:

- Teachers have aligned resources to help provide a more complete picture of student performance and, therefore, have additional sources of information to better understand and meet the needs of students.
- Principals have additional information to help identify areas of strengths and weaknesses as they make smart instructional decisions to improve student learning.
- School systems will reduce overall local testing while helping to monitor progress toward school system goals.

“LEAP 360 is a powerful tool our district is leveraging to achieve our ultimate goal of creating and sustaining a cohesive system between assessments, professional learning, and curricula implementation that prepares our students for college and career success.” - Rebecca Freeland, Richland Parish Talent Pipeline Lead
