

LDOE Weekly Newsletter

August 20, 2019

Dear Colleagues,

Today the Department announced that in 2019 more Louisiana students than ever before achieved scores that generated nationwide college credit on College Level Examination Program (CLEP®) exams. [Data released today](#) show that since 2015, the number of CLEP credits awarded to Louisiana students annually has increased from more than 1,000 to more than 8,000. This is remarkable progress.

As you know, [CLEP](#) is a credit-by-examination program that provides students an opportunity to demonstrate their mastery of college-level materials in introductory subjects and earn college credit applicable at postsecondary institutions nationwide. In Louisiana, students who take dual enrollment courses or Advanced Placement courses may take CLEP exams to demonstrate not only that they have earned college credit, but also that they have mastered college-level material. Passing the nationally recognized assessment distinguishes a student for her ability to learn and compete in any college, in any state.

The topic of early college course access for high school students is sure to be a topic of significant discussion in the months to come. The Governor and the Commissioner of the Board of Regents have rightly been outspoken in their advocacy for expanded access to such courses. I support fully their mission to make at least two college-level courses available for free, per year, for high school juniors and seniors. As we have this discussion about access, however, let us not forget to define the highest levels of learning, the truest demonstration of excellence. Going to college is, after all, not just a means to a transcript. It is a means to the deepest and most profound learning. Today's results show that our students are, without question, capable of this level of learning, and that they are owed a chance to demonstrate it. Congratulations to these outstanding students and their teachers.

As always, thank you for all you do for our children,

John

School System Support

New: Cyber Security Update

The Department would like to thank school systems for being diligent in taking preventative steps and, in unfortunate cases, responding swiftly and working with state officials to remediate infected areas.

The Governor has extended the declaration of emergency for an additional month to allow for the continued support of recovery efforts. He has also directed the Office of Technology Services to collect additional information on the current security and technology infrastructure status of school systems via a new [online survey](#). **This survey needs to be completed by EOD Friday, August 23.** This information will be used to provide additional state guidance and next steps to Superintendents and their IT staff during a meeting at the Claiborne Building in Baton Rouge on September 26 at 10:00 a.m.

Additionally, in order to better prevent future cyberattacks, the Department, in coordination with the Office of Technology Services, will provide a full year of Carbon Black predictive endpoint security software to detect and provide analytics for mitigating and stopping future cyber threats. Additional details about Carbon Black will be provided to school system technology coordinators via a [webinar on Tuesday, August 27 at 9:00 a.m.](#)

Please contact carol.mosley@la.gov with questions or concerns.

New: Tips to Completing the New Louisiana School System Contact Form Please share with personnel directors.

Earlier this month, the Department released the [Louisiana School System Contact Form](#) as a way to streamline the process of collecting contact information for key school system-level supervisors.

Based on feedback from school systems, the Department has updated the [guide](#) for personnel directors to provide definitions for certain roles collected in the form and offers the following tips for completion:

- **All contacts should be entered as “new contact” initially.** No contact information from any previous collection process will be carried over into the new form.
- **The new contact form will replace all other processes for collecting contact information for school system supervisors starting October 1.**

- If your school or school system is not listed in the form, please email ldoecommunications@la.gov.

All **contacts should be entered into the form by September 13**. Please email ldoecommunications@la.gov with questions.

Reminder: School Support Institutes

School leadership teams play an important role in ensuring teachers plan for and deliver instruction in a way that meets the needs of their students. The Department will host [School Support Institutes \(SSI\)](#) during the 2019-2020 school year to support school leaders in this role.

Each CIR and UIR-A school can bring up to three leadership team members to the School Support Institutes. School system staff are also invited to participate. Participants will choose one of three pathways for the entire training sequence. School teams can choose different pathways for team members to attend or select one pathway to attend together.

The Department recommends attendees include one building-level administrator and two others who support teachers in planning and instruction. School systems are allotted seats based on the number of CIR/UIR-A schools in their system. School systems that have no CIR/UIR-A schools will be allotted two school system-level seats.

On August 27 and 29, the Department will host a webinar to provide additional information on the SSI registration process, and the three pathways available.

- **ACT is providing Louisiana schools with an opportunity to upload the names of students taking accommodated WorkKeys paper tests into PearsonAccess^{Next}.** This upload will allow ACT to print barcode labels for students who are administered this form of ACT. Printing and affixing barcode labels to student answer documents will ensure more accurate reporting of student demographic data. While this step is not required, the Department strongly recommends it.

Reminder: Science Test Session Reductions

After analyzing the spring 2019 assessment data and holding many conversations with stakeholders, the Department is shortening the LEAP 2025 grades 3 and 4 science summative assessments to reduce testing time by approximately 30 percent.

- The new designs of the grades 3 and 4 science assessments reduce the number of sessions from three sessions to two by eliminating the task set and making changes in the numbers of item sets and stand-alone items (differs by grade).
- The new designs of the grades 5 to 8 science assessments reduce the number of sessions from three to two by eliminating four stand-alone items and the embedded field-test portion of the tests. The grades 5 to 8 field tests will only be required for a sample of students, rather than all students statewide.

More specific test design information is detailed in the updated [science assessment guides](#), which are currently available. Although the 2019-2020 practice tests for science do not reflect the new science test designs, the [LEAP 2025 Science Practice Test Guidance](#) has been updated to include recommendations on how to address the design changes, especially in grades 3 and 4.
