Louisiana’s ESSA plan provides a Title I allotment to support school systems and students in gaining access to academic courses, credentials, and services that are not otherwise available at their schools. Louisiana’s state plan distributes the set-aside to LEA’s using the Title I formula, thereby not reducing the total local Title I award while requiring funds to be spent on basic access for the most at-risk students.

Regulatory Funding Requirements

- No more than two percent of the total DSS award can be used to cover administrative costs
- Up to one percent of the total DSS award can be used for outreach and communication to parents about courses or services provided by DSS

Funding prioritization:

1. Low-achieving students who are enrolled in Title I schools identified as a Comprehensive Intervention Required
2. Low-achieving students who are enrolled in schools identified as Urgent Intervention Required
3. Low-achieving students who are enrolled in schools identified as Urgent Intervention Needed
4. Low-achieving students in other Title I schools
5. Low-achieving students in non-Title I schools

Key requirements for program implementation:

- The school system must provide adequate outreach to ensure parents can exercise a meaningful choice of direct student services for their child’s education, and ensure parents have adequate time and information about direct student service opportunities.
- The LDOE will monitor the expenditure of the funds and the parent engagement as part of the annual federal monitoring process.
- Publicly report the results of direct student service providers in improving relevant student outcomes in a manner that is accessible to parents.

School Systems are encouraged to prioritize funds to ensure experiences of students are driving them toward an on-time graduation; students graduate with career and/or college credentials; and students graduate eligible for a TOPS Award.
