Louisiana students are just as smart and capable as any students in America. While Louisiana is seeing positive growth as a result of its efforts to support schools and school systems—from an increase in the percentage of proficient early childhood centers serving at-risk children, to an increase in students scoring mastery in 3rd grade, and graduation and credential rates reaching an all-time high—there is still work that needs to be done.

To ensure every student is able to achieve their potential, Louisiana educators must ensure that, every day, all students attend schools that treat them with dignity and respect, where they have the opportunity to:

- **build** knowledge of the world,
- **read** meaningful texts,
- **express** ideas through writing and speaking, and
- **solve** complex problems.

Louisiana’s [academic plan](#) for the 2019-2020 school year ensures that teachers have the support they need to be fully prepared to deliver high-quality instruction for every student every day. This includes:

- Principals, leadership teams, content leaders and mentor teachers using observations, common planning time, and coaching to support teachers in delivering high-quality lessons.
- School systems creating supportive structures to facilitate teacher preparation and student learning.
- The Department providing tools and resources to support school systems in executing their academic plans.

The [Educator Resource Guide](#) serves as a centralized tool to provide teachers, school and school system leaders with the resources to effectively start the 2019-2020 school year within five priority areas:
