Devices

In order to administer our state’s upcoming online assessments, each school will need a minimum 7:1 student to device ratio. In 2014-15, students in grades 5-11 will be testing online. In 2015-16, students in grades 3-11 will be testing online. Many districts are aiming for an even lower ratio which will allow students to benefit from technology during their regular daily instruction. Districts have numerous options for personal computing devices to support both assessment and daily instruction, including laptops, tablets and traditional desktop computers.

Students to Device Ratio

Network Readiness

Network readiness determines whether a school’s internal network and/or a district’s school-to-school network is able to support student learning and testing on either a wired or wireless infrastructure. A district is capable of supporting testing at the 7:1 non-cached mode for each of the network pieces (internet, WAN and LAN). Districts must consider both their Local Area Network (LAN) and the Wide Area Network (WAN) capacities and speed to ensure adequate student access.
